

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Luxembourg. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.  
What educational path would you recommend for me?

Thanks for sharing that! Living in Denmark and being fluent in Danish gives you some strong options within one of the best education systems in Europe. Since you've just finished **primary school** (typically **Folkeskole** up to 9th or 10th grade), your next step will depend on your interests, strengths, and long-term goals. Here's a breakdown of your main educational paths in Denmark:

## 🎓 1. Gymnasiale uddannelser (General Upper Secondary Education)

If you're academically inclined and possibly interested in university later.

### Main options:

- **STX (Alment Gymnasium)** – Broad academic subjects including humanities, sciences, and social sciences. Good if you're unsure but want options.
- **HHX (Higher Commercial Examination Programme)** – Focus on business, economics, and marketing. Great if you're business-minded.
- **HTX (Higher Technical Examination Programme)** – Focus on science, technology, and engineering. Ideal for tech or engineering interests.
- **HF (Higher Preparatory Examination)** – A shorter, 2-year option, often for students who prefer a more practical academic route or are a bit older.

🟢 **Recommended if** you enjoy studying and may want to go to university (in Denmark or abroad, including Luxembourg).

## 🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

If you prefer a hands-on, practical education that leads to a job directly.

### Examples:

- Electrician, carpenter, chef, healthcare assistant, IT technician, etc.
- Mix of school and apprenticeship/workplace training.

🟢 **Recommended if** you like practical work and want to start a career early, possibly with the option to continue later into **EUX** (a mix of vocational and academic, allowing university access).

## 👤 3. EUX – The Combined Path

A hybrid of vocational training and academic courses that gives both a trade qualification **and** access to higher education.

● **Recommended** if you want a trade but also want to keep the door open for university.

---

## 🕒 What to Consider:

- **Do you enjoy academic subjects or prefer practical work?**
  - **Do you want to go to university eventually (in Denmark or Luxembourg)?**
  - **Are you interested in a specific field (e.g. business, tech, health, arts)?**
  - **Would you like to live or study abroad later?** (Your Luxembourgish background could make university in Luxembourg or other EU countries easier.)
- 

## 🇱🇺 Bonus Option: Luxembourg Connection

You might also explore if Luxembourg offers any scholarships, exchange programs, or remote learning support for citizens abroad — especially if you're considering university later.

---

## Summary Recommendation:

At 16, the most flexible and common choice is to enter a **Gymnasial uddannelse**, especially **STX** or **HHX**, depending on your interests. This keeps university open as an option and gives you time to explore.

But if you're already drawn to a specific trade or hands-on field, **EUD** or **EUX** could be a smart and rewarding path too.

---

Would you like help figuring out which **Gymnasium programs** match your interests? I can ask a few questions to help narrow it down.
