

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Madagascar. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing a bit about yourself — that's a great start to making an informed decision. Since you're 16, finished primary school in Denmark, and are fluent in Danish, you're in a good position to explore several educational paths. In Denmark, after primary school (folkeskole), students usually choose between **general upper secondary education (gymnasiale uddannelser)** or **vocational education and training (erhvervsuddannelser)**.

Here's a clear breakdown of your main options, based on your interests and goals:

🎓 1. General Upper Secondary Education (Gymnasiale Uddannelser)

This is a great path if you enjoy academic subjects and want to keep your options open for university later.

Options:

- **STX (Studentereksamen):** Broad academic focus (science, humanities, social studies)
- **HHX (Higher Commercial Examination):** Focus on business, economics, and languages
- **HTX (Higher Technical Examination):** Focus on technology and science
- **HF (Higher Preparatory Examination):** Shorter (2-year), more practical, good if you're unsure or want to change direction later

✅ Best if you:

- Want to go to university
- Like studying subjects like literature, history, science, languages, etc.
- Aren't sure what job you want yet, and want to keep doors open

🔧 2. Vocational Education and Training (Erhvervsuddannelser – EUD/EUX)

This combines school with hands-on experience (praktik), and you'll become qualified for a specific profession (e.g., electrician, carpenter, healthcare worker, etc.).

Options:

- **EUD:** Focuses on getting you into a trade or job quickly
- **EUX:** Combines EUD with some academic studies, so you can also qualify for higher education later

✅ Best if you:

- Want to start working earlier
 - Like learning by doing (praktik)
 - Are interested in specific careers like tech, design, social care, mechanics, hospitality, etc.
-

Special Note: Your Background

Having roots in Madagascar and growing up in Denmark gives you a valuable multicultural perspective. If you're interested in international work, languages, diplomacy, or development, these can be great strengths — and can influence your educational focus (e.g., studying languages, international studies, or global business).

How to Decide

Ask yourself:

- Do I enjoy studying in a classroom, or do I prefer learning by doing?
 - Do I have a clear idea of a profession I want to pursue?
 - Would I like to go to university one day?
 - Am I more into science, business, arts, or technical things?
-

My Recommendation (Based on What You Shared)

If you're unsure what you want yet and enjoy academic subjects:

➔ **Go for STX or HF** — they give you a broad foundation and time to discover your interests.

If you already have a strong interest in a trade or practical career:

➔ **Go for EUX** — it's flexible, and you won't be locked out of higher education later.

If you tell me more about what you're good at or what subjects you like most, I can help narrow it down even more.
