

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Malawi. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question—and it's fantastic that you're thinking carefully about your next step. Living in Denmark with a multicultural background and fluency in Danish gives you a strong foundation. Since you've just finished primary school (typically 9th or 10th grade in Denmark), you have several good options depending on your interests, goals, and learning style.

Here's a breakdown of the main educational paths available in Denmark after primary school:

1. Gymnasiale uddannelser (Upper Secondary Education)

These are academic upper secondary programs that prepare you for higher education like university. Great if you enjoy studying theory, books, and broad subjects.

Main types:

- **STX (Studentereksamen):** Focuses on general academic subjects like languages, history, science.
- **HHX (Højere Handelseksamen):** Focus on business, economics, and marketing.
- **HTX (Højere Teknisk Eksamen):** Focus on science, technology, and IT.
- **HF (Højere Forberedelseksamen):** Shorter program (2 years), more flexible, good for adults or people who want a second chance.

Recommended if: You enjoy academic learning and want to go to university later.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These are practical programs that combine school with apprenticeships. You train to become something like a mechanic, hairdresser, carpenter, chef, social care assistant, etc.

Recommended if: You want to start working earlier, enjoy hands-on work, and are more practical than theoretical.

3. Kombineret Ungdomsuddannelse (KUU)

For young people who aren't quite ready for vocational or academic paths. Offers personal development, practical training, and helps figure out a future direction.

Recommended if: You're not sure yet, or you need a bit more support to get ready for a job or further education.

4. EUX – Vocational + Academic Hybrid

A very good option if you want the best of both worlds. You get a vocational education **plus** qualifications that allow you to go to university later.

Recommended if: You like practical work but still want the option to go to university someday.

✨ How to Decide?

Here are some questions to ask yourself:

- Do I like academic subjects like math, literature, or science? → Maybe **STX
