

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Malaysia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question—and a very important moment in your life. Since you've just finished primary school in Denmark (which usually ends around the 9th or 10th grade), you're now looking at a few different options depending on your interests, goals, and strengths. Here's a breakdown of the most common educational paths available in Denmark after primary school, with recommendations tailored to your situation:

🎓 Main Educational Paths After Primary School in Denmark

1. Gymnasium (STX, HHX, HTX) – Upper Secondary School (3 years)

These are academic programs that prepare you for university:

- **STX (Almen Studentereksamen):** General high school, broad subjects (languages, science, social science). Good if you're unsure but want to keep doors open.
- **HHX (Højere Handelseksamen):** Focus on business, economics, and marketing. Great if you're interested in finance or entrepreneurship.
- **HTX (Højere Teknisk Eksamen):** Focus on technology, science, and IT. Ideal if you like STEM subjects.

✅ **Recommended if:** You enjoy school subjects, might want to go to university, and want more time to figure out your future.

2. EUD/Erhvervsuddannelse – Vocational Education and Training (2–4 years)

This path prepares you for a specific trade or profession. You get hands-on training and often start working right after.

- Examples: Electrician, carpenter, chef, hairdresser, healthcare assistant, IT-supporter.
- Dual education: Combination of school and paid internships.

✅ **Recommended if:** You enjoy practical work, want to earn money sooner, and like learning by doing.

3. EUX – Combined Vocational and Academic Education

This combines EUD with parts of the gymnasium curriculum, allowing you to both learn a trade and qualify for higher education.

✅ **Recommended if:** You want the best of both worlds—practical skills + the option to go to university.

4. IB (International Baccalaureate)

If you're interested in an international education (taught in English), the IB might be a good fit. It's offered in several Danish schools.

✓ **Recommended if:** You're interested in studying abroad, like English, and want a more global curriculum.

🕒 How to Choose – A Few Key Questions:

Ask yourself:

- What subjects do I enjoy the most?
- Do I prefer theory or hands-on learning?
- Do I want to go to university?
- Do I want to start working sooner?
- Would I like to combine work and study?
- Do I have any long-term career dreams?

💬 My Personalized Suggestion for You:

Since you're fluent in Danish, born and raised in Denmark, and just starting out, here's a simple guide:

If You Like	Then Consider
Broad learning, university later	STX (Gymnasium)
Business and economics	HHX
Tech and science	HTX
Practical work or trades	EUD or EUX
English-language and international path	IB

If you're still unsure, **STX** is often a safe, flexible option.

🧠 Pro Tip:

Before deciding, consider visiting **education fairs**, **talking to guidance counselors** at your school or local UU-vejledning (youth guidance center), or **shadowing a student** in one of the paths you're interested in.

Would you like me to help you compare a couple of these schools near where you live, or give info on what jobs different paths can lead to?
