

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Malaysia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question, and you're in a very exciting stage of life with lots of possibilities ahead! Since you're 16 and have finished primary school in Denmark (which usually ends at around 9th or 10th grade), your next step typically falls into one of the main upper secondary education paths. Here's a breakdown of your options and what might suit you depending on your interests, goals, and strengths:

🎓 Main Educational Paths in Denmark After Primary School:

1. STX – Studentereksamen (General Upper Secondary School)

- **Focus:** Academic subjects – good for university preparation.
- **Best if:** You enjoy a broad mix of subjects like history, languages, sciences, or social studies.
- **Duration:** 3 years.
- **Leads to:** University, professional bachelor programs, or other higher education.

2. HHX – Higher Commercial Examination Programme

- **Focus:** Business, economics, international trade.
- **Best if:** You're interested in entrepreneurship, economics, business, or working in companies.
- **Duration:** 3 years.
- **Leads to:** Business studies in university or direct entry into commercial fields.

3. HTX – Higher Technical Examination Programme

- **Focus:** Technology, natural sciences, engineering.
- **Best if:** You like math, physics, IT, or want a technical career.
- **Duration:** 3 years.
- **Leads to:** Engineering studies, technical university, or applied sciences.

4. EUX – Vocational Education + Higher Education Access

- **Focus:** Combines vocational training with academic studies.
- **Best if:** You want practical training (e.g., electrician, IT, health, chef) but also want access to higher education.
- **Duration:** 4-5 years.
- **Leads to:** Skilled job + option to study further.

5. EUD – Vocational Education

- **Focus:** Direct skills for a specific job (plumber, hairdresser, carpenter, etc.).
 - **Best if:** You want to start working in a profession sooner and love hands-on learning.
 - **Duration:** 2-4 years.
 - **Leads to:** Employment or further specialization.
-

How to Decide What's Right for You:

Ask yourself:

1. **What subjects do I enjoy the most?** (e.g., science, business, languages, hands-on work?)
 2. **Do I want to go to university someday?**
 3. **Do I prefer practical learning or academic learning?**
 4. **Am I interested in working in Denmark, or possibly abroad (e.g., Malaysia) in the future?**
-

With Your Background:

- Being fluent in Danish and having Malaysian roots could be a great asset if you're interested in **international business, languages, or multicultural work**.
 - HHX could suit you if you're interested in combining your Danish and Malaysian background for international opportunities.
 - STX is a solid choice if you're unsure and want to keep university options open.
 - EUX is a smart move if you like doing practical work but still want the chance to go to university later.
-

Final Tips:

- **Visit schools** during open house days ("åbent hus") to get a feel for the environment.
 - **Talk to a guidance counselor** at your current school or local "UU-vejleder" – they specialize in helping students like you make informed choices.
 - Consider combining your personal interests (e.g., tech, culture, business) with your strengths in school.
-

Would you like to tell me a bit more about your interests or what subjects you've liked the most? I can give you a more personalized suggestion.
