

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Maldives. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing that — it's great that you're thinking ahead about your future. Since you're in Denmark, just finished primary school (or *folkeskole*), and are fluent in Danish, you have several solid options depending on your interests, goals, and whether you're leaning more toward academics, hands-on work, or a mix of both.

Here's a breakdown of your main **educational paths after 9th grade** in Denmark:

1. Gymnasium (General Upper Secondary Education)

If you're interested in going to **university later**, this is the most common path.

- **STX (Studentereksamen):** Focuses on humanities, science, and social sciences.
- **HHX (Higher Commercial Examination):** Focus on business, economics, and international trade.
- **HTX (Higher Technical Examination):** Focus on technology, science, and innovation.
- **HF (Higher Preparatory Examination):** Shorter (2 years), often for people who want a faster route to higher education.

 Good if:

You enjoy academic subjects and want to keep your options open for university (like becoming a doctor, engineer, lawyer, teacher, etc.).

2. EUD (Erhvervsuddannelse – Vocational Education)

This is for you if you'd prefer **learning by doing** and want to get into the job market earlier, or work in trades or skilled professions.

Examples:

- Electrician
- Carpenter
- Hairdresser
- IT supporter
- Childcare assistant

Often includes a **praktik (apprenticeship)** part, where you get paid.

 Good if:

You enjoy practical work or already know you want a skilled job rather than university studies.

3. EUX (Combination of EUD + Gymnasium)

This is a **double track** where you both get a vocational education **and** a studentereksamen. It's demanding but gives you the chance to both get a skilled job or go to university afterward.

 Good if:

You want flexibility – a job with hands-on skills *and* the option to go to university.

What should *you* consider?

Here are some questions to help you decide:

- Do you enjoy school subjects like math, languages, or science?
 - Do you like working with your hands or being active?
 - Are you interested in going to university someday?
 - Do you already have an idea of a job you'd like?
-

Bonus Thought: Your Background

Being from a Maldivian background and fluent in Danish puts you in a unique position:

- **Multicultural communication skills** are valuable in many careers (especially in business, healthcare, education, and public service).
 - You could also explore **international studies, tourism, or language-focused careers**.
 - If you're interested in helping people, there's a big need for **bilingual youth** in teaching, nursing, social work, and interpretation.
-

What I Recommend (based on what you've said):

Since you're still exploring and fluent in Danish, I'd recommend:

1. **STX or HHX** if you're interested in university and want to keep your doors open.
2. **EUX** if you want both a job-ready education and the option to study later.
3. **EUD** if you're ready to get into a practical field and don't think university is for you.

If you tell me more about your interests (like favorite subjects, hobbies, or dream jobs), I can give a more personal recommendation.
