

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mali. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's great that you've finished primary school—congratulations! Since you're in Denmark and just finishing **Folkeskole (grundskole)**, you're at the typical age to choose between several **youth education options (ungdomsuddannelser)**. Your path should depend on your **interests, strengths, and long-term goals**, but I can help guide you with a general overview of your options and some advice tailored to your situation.

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are academic programs that prepare you for **university**:

Most common options:

- **STX (Almen studentereksamen)** – General academic track with focus on humanities, science, and social sciences.
- **HHX (Højere handelseksamen)** – Focus on **business, economics, and marketing**.
- **HTX (Højere teknisk eksamen)** – Focus on **science, technology, and engineering**.
- **HF (Højere forberedelseksamen)** – A 2-year program, more practice-oriented, often used by people who didn't finish 10th grade or want to switch later.

Choose this path if:

- You enjoy school subjects like math, languages, science, or economics.
- You want to study at university later (e.g., law, medicine, engineering, etc.)

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These are more **hands-on programs** that prepare you to work in a trade or profession.

You learn both in school and through **apprenticeships** (praktik) in real workplaces.

Examples:

- Electrician, carpenter, chef, mechanic, hairdresser, IT support, social and healthcare assistant.

Choose this path if:

- You want to work sooner and prefer practical skills.

- You like working with your hands or helping people.

There's also **EUX**, which combines **vocational training with academic subjects**, so you can **go to university** later too. It's more demanding, but flexible.

3. 10. klasse (Optional)

Some students choose to take an extra year in **10th grade** before moving on.

Choose this if:

- You want more time to mature, explore career options, or improve grades.
- You're not sure what you want yet.

You can take 10th grade at a **normal school**, **efterskole (boarding school)**, or **special 10th-grade centers**.

Consider your interests and strengths

Ask yourself:

- Do you enjoy schoolwork and academic challenges?
- Or do you prefer doing things with your hands or being active?
- Do you think about going to **university**, or do you want to **start working** sooner?

Also, think about what **inspires you culturally and personally**. You could consider fields like:

- **Healthcare** (especially needed in Denmark),
- **Technology/IT** (huge future job market),
- **Education or Social Work** (if you like helping others),
- **Business/Entrepreneurship** (if you dream of starting something yourself),
- Or something tied to your heritage and background—multicultural perspectives are important in many jobs.

My personal recommendation:

Since you just finished primary school, I suggest one of these two paths:

➤ If you enjoy school and think university might be for you:

- Choose **STX** or **HHX**.
- Consider **EUX** if you're also drawn to hands-on careers.

➤ If you prefer practical work or want a faster way to a job:

- Go for **EUD** in a field you're interested in (like electrician, mechanic, healthcare, IT, etc.)

- Or combine with **EUX** to keep doors open.
-

If you're still unsure, 10th grade can be a great way to figure things out, especially at an **efterskole**, where you can grow socially and personally.

Would you like help finding specific schools or programs near where you live?
