

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Malta. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Great! You're at an important crossroads, and it's good that you're thinking seriously about your next steps. In Denmark, after completing **primary school (folkeskolen)**, you typically have a few main options depending on your interests, strengths, and long-term goals.

Here's a breakdown of your choices and what each path might lead to:

1. Gymnasium (General Upper Secondary Education)

- **Examples:** STX, HHX, HTX, HF
- **Duration:** 2–3 years
- **Good for you if:** You enjoy academic subjects and are considering university in the future.
- **Differences:**
 - **STX** (Alment Gymnasium): Broad academic focus (humanities, sciences, languages).
 - **HHX** (Business): Focus on business, economics, and language.
 - **HTX** (Technical): Focus on science and technology.
 - **HF:** More practical/shorter route to higher education, often for mature students, but open to 16+.

 *Best if you like school subjects, want flexibility, and maybe want to go to university later.*

2. Erhvervsuddannelse (Vocational Education & Training / EUD)

- **Duration:** 2–5 years (depending on field and level)
- **Includes:** Apprenticeship/workplace training (you earn a salary during parts of it!)
- **Fields:** Everything from mechanics, carpentry, hairdressing, IT, to healthcare.
- **Good for you if:** You prefer hands-on learning and want to start a career relatively soon.

 *Best if you want to learn a trade or start working earlier, with an option to study further later if desired.*

3. Kombinationsforløb / FGU (Preparatory Basic Education)

- For students who are unsure, need extra support, or want to build skills before starting EUD or Gymnasium.

- Good for boosting grades or figuring out direction.

💡 *Useful if you're uncertain or need more preparation for the other paths.*

Extra Considerations for You

- **Multicultural background:** Could be a strength, especially in international business, diplomacy, or language-related careers.
 - **Fluent in Danish and (likely) English and/or Maltese:** This gives you a good base for international opportunities.
 - **Danish education system is flexible:** You can often switch paths or build on earlier qualifications.
-

My Recommendation (based on your situation)

If you're open to academics and unsure exactly what you want to do yet:

Go for STX or HHX.

This keeps doors open — whether for university, business, or even changing path later to a vocational or practical route.

If you **already have a passion** (e.g., mechanics, healthcare, tech), then a **vocational education** (EUD) could be a faster and more practical way to start your career.

Want a little help choosing?

If you tell me:

- What subjects you enjoy most
- What you imagine yourself doing in 5–10 years
- If you prefer theory or hands-on learning

...I can give a much more personalized suggestion 😊
