

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mauritania. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.  
What educational path would you recommend for me?

Thanks for sharing a bit about your background — it's great that you're thinking ahead about your future. Since you're 16 and have just finished primary school in Denmark, let's look at your educational options based on the Danish system and what might be a good fit for you depending on your interests, strengths, and long-term goals.

## Educational Pathways After Primary School in Denmark

After **folkeskole**, you typically have a few main options:

### 1. Gymnasium (General Upper Secondary Education)

- **Who is it for?** Students who enjoy academic subjects and might want to go to university later.
- **What's included?** Subjects like Danish, English, mathematics, science, history, social studies, etc.
- **Types of gymnasium:**
  - **STX** (general academic)
  - **HHX** (business-focused)
  - **HTX** (technology and science-focused)
  - **HF** (shorter, more flexible, for those who want quicker access to higher education)

**Recommended if:** You enjoy school subjects, want to keep your options open for university, and are comfortable in a classroom environment.

### 2. EUD (Erhvervsuddannelse) – Vocational Education and Training

- **Who is it for?** Students who want to learn a trade and start working sooner.
- **Fields:** Carpentry, mechanics, health care, IT, cooking, design, childcare, etc.
- **Combination:** School-based learning + internship in a company.
- **Length:** Typically 3–5 years, depending on the program.

**Recommended if:** You want a more hands-on approach and like practical work. You can still go to higher education later via **EUX** (see below).

### 3. EUX (Combination of Vocational Training + General Upper Secondary)

- Combines practical vocational training with academic courses that qualify you for university.

- **Good if:** You want both job skills and the option to go to university later.
- 

## **How to Decide?**

Here are some guiding questions:

- Do you enjoy academic subjects like math, science, or literature?
  - Do you prefer practical or hands-on learning?
  - Are you thinking about university?
  - Do you want to work sooner or keep studying?
- 

## **My Advice Based on What You've Said**

Since you're fluent in Danish, have completed primary school, and seem reflective and thoughtful:

### ◆ **If you're unsure and want to keep doors open:**

→ **Choose STX or HF.** This keeps your options open for university, including studying law, medicine, business, etc. HF is a bit more flexible and shorter.

### ◆ **If you like working with your hands or want a faster way into a profession:**

→ **EUD or EUX.** You could become a skilled worker with high job demand (e.g. electrician, carpenter, IT support, nurse assistant), or combine it with academic subjects to go further.

---

## **If You Tell Me More...**

If you can tell me about:

- What subjects you like
- If you're more into working with people, ideas, or things
- Whether you prefer practical or theoretical work
- Any dream jobs or interests

...then I can give you a more personalized recommendation.

Would you like to share a bit more about that?
