

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mexico. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that! You're in a really important stage of life, and it's great that you're thinking seriously about your next step. Since you're in Denmark and just finished **folkeskolen**, you now have a few different educational options. I'll break them down for you and then give some suggestions depending on your interests and goals.

Your Main Educational Options After Folkeskolen in Denmark:

1. **Gymnasiale uddannelser (General Upper Secondary Education)**

These are more academic and prepare you for university.

- **STX (Alment gymnasium):** Broad education with focus on humanities, sciences, and social studies.
- **HHX (Handelsgymnasium):** Focus on business, economics, and international trade.
- **HTX (Teknisk gymnasium):** Focus on science, technology, and innovation.
- **HF (Højere Forberedelseseksamen):** Shorter program (2 years), more direct path to certain higher education.

2. **Erhvervsuddannelser (Vocational Education and Training – EUD)**

These combine school and apprenticeship (praktik), leading to skilled trades or practical jobs like:

- Electrician
- Carpenter
- Hairdresser
- Chef
- Healthcare assistant

You can also go from EUD to higher education later through **EUX**.

3. **EUX – The Hybrid Path**

Combines vocational training with subjects at gymnasium level. You get both a skilled trade and a university entrance qualification. It's more demanding but gives you lots of flexibility.

4. **International Options**

If you're fluent in English or want to explore global opportunities, you could consider **International Baccalaureate (IB)** or other international schools.

What to Think About Before Choosing

Ask yourself:

- Do I want to go to university later?
- Do I enjoy practical work or more academic studies?
- What subjects do I enjoy most? Math, languages, science, history, etc.?
- Do I want to start working sooner or study longer?

Recommendations Based on Scenarios

Interest/Goal	Recommended Path
Want a university education (e.g., law, medicine, engineering)	STX, HTX, or HHX (depending on interest)
Interested in tech, design, or science	HTX or EUX with a technical focus
Want to work in business or entrepreneurship	HHX or EUX business route
Prefer practical skills or hands-on work	EUD or EUX
Still unsure	STX is the broadest, gives time to figure things out

Bonus: Your Background

Since you're bilingual and have a multicultural background (Danish-Mexican), you might also consider:

- **Language or international studies**
- **International business**
- **Jobs where cultural understanding is valuable** (e.g., diplomacy, marketing, NGOs)

Being fluent in Danish and connected to another culture is a big strength in today's global world.

My Suggestion

If you're not 100% sure yet and you enjoy academic subjects, **STX** might be your best bet — it keeps most doors open. But if you're more practical or curious about a trade *and* want the option of university later, **EUX** is an excellent, underrated path.

Let me know what subjects you enjoy or what kind of work you're curious about, and I can help narrow it down more!
