

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mongolia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great place to be — finishing primary school and thinking about your future! Since you're in Denmark, your next step usually depends on your interests, strengths, and career goals. Here's a breakdown of your main options, with some recommendations tailored to your situation:

🎓 1. Gymnasiale Uddannelser (Upper Secondary Education)

These are academic-focused and lead to university.

A) STX (Alment Gymnasium)

- Focus: Broad, general education (languages, sciences, social sciences).
- Good for: If you like academic subjects and might want to go to university but aren't sure what to study yet.
- Recommendation: A strong choice if you're unsure but want to keep your options open.

B) HTX (Teknisk Gymnasium)

- Focus: Technology, science, and innovation.
- Good for: If you're interested in engineering, IT, or science.
- Recommendation: Consider this if you enjoy math, physics, or technical projects.

C) HHX (Handelsskole)

- Focus: Business, economics, and marketing.
- Good for: If you're interested in working in business or starting your own company.
- Recommendation: Could be a strong option if you're entrepreneurial or interested in international trade (maybe even linking Denmark and Mongolia someday).

D) HF (2-year Higher Preparatory Examination)

- Focus: More compact academic program.
- Good for: If you want to finish faster or need a slightly less demanding academic environment.
- Recommendation: Can be a good second-chance path if you're not ready for 3-year gymnasiale education.

🔧 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These are job-focused and lead to skilled trades.

- Focus: Learning a trade like electrician, mechanic, carpenter, chef, or health care assistant.
 - Structure: Mix of school and apprenticeship (you work at a real job while studying).
 - Good for: If you prefer hands-on work or want to enter the job market sooner.
 - Recommendation: A solid path if university isn't for you. Also a smart move if you want a practical career with good job prospects.
-

What to Consider When Choosing:

- **What subjects do you enjoy most?** Math, languages, science, social studies?
 - **Do you prefer hands-on work or academic study?**
 - **Do you think you want to go to university later on?**
 - **Are you interested in working internationally (Denmark + Mongolia)?**
-

Bonus Ideas Just for You

Because of your Mongolian background and Danish upbringing:

- **Languages and international studies** could be an advantage — maybe look at STX with a focus on languages or international studies.
 - If you're interested in **connecting cultures** (e.g., business between Denmark and Mongolia), **HHX** with international business could set you up well.
 - If you're a tech-lover or interested in science/engineering, **HTX** can give you a strong, modern education.
-

Summary Recommendation:

If you're still unsure, **STX** is a great general option that keeps most doors open.

If you already know you love tech, business, or working with your hands, then **HTX**, **HHX**, or **EUD** might be better.

Want help thinking about career paths too (like what jobs these lead to)?
