

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Montenegro. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing a bit about yourself! It's great that you're thinking seriously about your next step after primary school. Since you're 16 and in Denmark, you have a few solid options ahead of you — and the best path depends on your interests, strengths, and long-term goals. Here's a breakdown of the main educational paths you could consider:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education)

This is the most common next step if you're interested in pursuing university later.

a) STX (Studentereksamen)

- **Focus:** General academic education with a wide range of subjects like Danish, science, languages, and social studies.
- **Best for:** If you're unsure what you want to do yet, or you want the broadest options later.
- **Duration:** 3 years.

b) HHX (Higher Commercial Examination Programme)

- **Focus:** Business, economics, marketing, and languages.
- **Best for:** If you're interested in business or finance.
- **Duration:** 3 years.

c) HTX (Higher Technical Examination Programme)

- **Focus:** Science, technology, IT, and engineering subjects.
- **Best for:** If you're into tech, engineering, or science.
- **Duration:** 3 years.

d) HF (Higher Preparatory Examination)

- **Focus:** More practical, slightly less academic than STX/HHX/HTX.
- **Best for:** If you want a quicker path to some professions or higher education.
- **Duration:** 2 years (usually for slightly older students or those who want a fresh start).

🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

- **Focus:** Hands-on training for specific professions (like electrician, hairdresser, carpenter, chef, healthcare assistant).
- **Best for:** If you prefer practical work and want to start earning earlier.
- **Combination:** Usually combines school and apprenticeship in a company.
- **Duration:** 2-5 years depending on the trade.

3. Kombineret EUD og EUX

- **Focus:** Combines vocational training **with** an upper secondary exam so you can go straight to university **or** work.
- **Best for:** If you want both practical experience and the option for further education.
- **Example:** You could become an IT supporter and still go to university later.
- **Duration:** Around 4-5 years.

Which Path is Right for You?

Here are some questions to guide your decision:

- Do you enjoy academic subjects and want to go to university? → STX, HHX, or HTX
- Do you prefer learning by doing and want to start working sooner? → EUD or EUX
- Do you have a strong interest in a specific area like business, science, or technology? → Pick a gymnasial program that matches
- Still unsure? → STX or HF might give you more time to figure it out.

My Personal Recommendation (based on what you shared)

Since you just finished primary school, are fluent in Danish, and likely grew up biculturally, you might benefit from a **gymnasial program** — like **STX or HHX** — to keep your options open. They'll give you time to develop academically and personally while you figure out what kind of career you'd enjoy.

However, if you already know you're not into sitting in a classroom all day and want something more hands-on, EUX is a really smart choice because it doesn't close the door to further education.

If you tell me more about your interests (e.g. favorite subjects, what you enjoy doing, what kind of job you imagine), I can give you an even more specific recommendation.
