

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Montenegro. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing your background — it sounds like you're at an important turning point. In Denmark, after primary school (9th or 10th grade), you typically have a few main options depending on your interests, strengths, and long-term goals. Since you're fluent in Danish and have a multicultural background, that gives you extra flexibility. Here's a breakdown to help you think through your next step:

1. Erhvervsuddannelser (Vocational Education and Training - EUD)

Best for you if: You enjoy practical, hands-on work and want to start working earlier.

- **Examples of jobs:** Electrician, mechanic, chef, hairdresser, carpenter, etc.
- You can start earning while you learn through **apprenticeships (læreplads)**.
- Some tracks can also lead to higher education later (like **EUX**, which combines vocational training with academic studies).

2. Gymnasiale uddannelser (Upper Secondary Education)

This is a more academic path, typically 3 years, and leads to higher education like university.

You have several options here:

a) STX (Alment Gymnasium)

- Broad general education with focus on humanities, science, and social studies.
- Best if you're unsure yet and want to keep all university doors open.

b) HHX (Higher Commercial Examination)

- Focus on business, economics, marketing, and international trade.
- Good fit if you're interested in business or entrepreneurship.

c) HTX (Higher Technical Examination)

- Focus on natural sciences, technology, and innovation.
- Best if you're into science, IT, or engineering.

d) HF (Higher Preparatory Examination)

- Shorter (2 years), more direct path to university colleges.
- Often more mature or practical-minded students choose this.
- Good if you didn't enjoy primary school and want a different experience.

3. International and Alternative Options

Since your parents are from Montenegro and you may speak more than one language, you might also consider:

- **International Baccalaureate (IB)** if you're very academically motivated and like English-language education. This opens doors to universities abroad.
- **Private or international schools** in Denmark that offer a different structure or more international focus.

? How to Decide

Here are a few questions to ask yourself:

- Do I enjoy school and studying? → If yes, **STX**, **HHX**, or **HTX** are good.
- Do I want to work soon or prefer practical learning? → Look into **EUD** or **EUX**.
- Am I more into business, science, or hands-on work?
- Do I want to go to university in the future?

Suggested Next Steps

1. **Talk to a vejleder (educational counselor)** at your school or local **UU-center**.
2. **Visit open house events** at gymnasiums and vocational schools.
3. Try **intro weeks** or internships (**brobygning**) to test different paths.
4. Involve your family in the decision — but also listen to yourself.

Would you like help figuring out which schools near you offer the options you're most interested in? I can help you search or narrow it down.
