

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mozambique. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing that! You're in an important and exciting moment in your life — choosing what direction to take after primary school. In Denmark, after completing **Folkeskolen**, you typically have a few main options depending on your interests, strengths, and future goals. Here's a breakdown of your options, along with some guidance based on common student profiles:

🎓 Main Educational Paths After 9th or 10th Grade in Denmark

1. Gymnasiale uddannelser (General upper secondary education)

These are more academic and prepare you for university.

- **STX (Studentereksamen)** – Broad academic focus, good if you're unsure what you want later.
- **HHX (Higher Commercial Examination)** – Focus on business, marketing, and economics.
- **HTX (Higher Technical Examination)** – Focus on science, technology, and engineering.
- **HF (Higher Preparatory Examination)** – Shorter (2 years), more direct access to certain university programs or professions.

👉 *Recommended if:* You like academic subjects, want to keep your options open, or plan to attend university in the future.

2. Erhvervsuddannelser (Vocational education and training - EUD/EUX)

These are hands-on and prepare you for a profession directly (like electrician, carpenter, healthcare worker, etc.).

- **EUD (Vocational Education)** – You combine school with internships and become ready for the job market.
- **EUX** – A mix of vocational and academic education, giving you both a trade and the option for further studies later.

👉 *Recommended if:* You want a faster way into a job, like working with your hands, or have a specific profession in mind.

3. 10th Grade (10. klasse)

An optional extra year that helps you mature academically or personally before choosing a specific upper secondary path.

👉 *Recommended if:* You're not quite sure yet what to choose, or you want to improve your grades and get ready for the next level.

😐 What to Consider When Choosing:

- **Do you enjoy academic subjects like Danish, English, math, science, or history?**
→ If yes, then STX, HHX, or HTX could be a good fit.
- **Are you more practical, creative, or hands-on?**
→ EUD or EUX might be better, especially if you want to work sooner or prefer learning by doing.
- **Not ready to decide yet?**
→ Consider 10th grade. It's not a step back — it's often a smart pause.

Denmark-Specific Advice

As someone born and raised in Denmark with Mozambican roots, your background can be a strength:

- Some schools have diversity-focused support programs and mentorship — worth asking about when visiting schools.
- If you ever want to work internationally or connect your Danish education to Africa or global issues, HHX or STX (with subjects like international economics, English, social studies) could be useful.
- Don't hesitate to reach out to guidance counselors (**UU-vejledere**) — they are there to help you choose based on your personal goals.

My Personal Recommendation (based on your situation):

If you:

- Enjoy school and think you might want to go to university someday → **STX** or **HHX**
- Are curious about business, economics, or international topics → **HHX**
- Are not 100% sure and want to keep both academic and practical doors open → **EUX**
- Want more time to think or boost confidence → **10th grade** (then choose one of the above)

Would you like help exploring specific schools or programs near you in Denmark? Or do you already have an idea what subjects or careers you enjoy? That could help narrow it down even more.
