

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mozambique. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing that! You're at a great point in life—finishing primary school is a big step, and it's smart to be thinking carefully about what comes next. Since you're in Denmark and just finished **folkeskolen**, you have several options depending on your interests, learning style, and future goals. Here's a breakdown of the most common educational paths after primary school in Denmark:

1. Gymnasiale Uddannelser (Upper Secondary Education)

This is for you if you think you might want to go to university later. These programs usually take 3 years.

Options:

- **STX (Studentereksamen):** Broad academic program (science, humanities, social science). Good if you're still unsure.
- **HHX (Højere Handelseksamen):** Focuses on business, economics, and marketing.
- **HTX (Højere Teknisk Eksamen):** Focuses on technology and natural sciences.
- **HF (Højere Forberedelseksamen):** A 2-year program. More direct and less theoretical, for those who might not want the full 3 years.

✓ *Best for:* If you want to go to university or want to keep your options open.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

If you prefer hands-on work and want to get into the workforce sooner, this is a great path.

- You can become things like: electrician, mechanic, hairdresser, carpenter, healthcare worker, etc.
- Often includes an apprenticeship (praktik), so you're earning while learning.

✓ *Best for:* If you want practical skills and a clear job path after school.

3. Kombineret ungdomsuddannelse (KUU)

This is for young people who might need a more flexible or supportive education path. It's aimed at those who might not be ready for gymnasiale or vocational education yet.

✓ *Best for:* If you need a more adapted program that prepares you slowly for work or further education.

Questions to Ask Yourself:

- Do I enjoy studying and academic work?
- Do I prefer working with my hands or in practical situations?
- Am I interested in business, tech, science, art, or healthcare?
- Would I like to go to university one day?
- How do I learn best—by reading/writing or doing/making?

My Suggestion (based on what you've shared):

Since you're fluent in Danish, and you've completed Danish primary school, you have full access to all the educational opportunities in Denmark.

If you're not sure what career you want yet and you enjoy academic subjects:

 **STX** might be the best place to start. It gives you 3 years to try different subjects and figure things out.

If you're more interested in business or want to work in marketing, entrepreneurship, or sales:

 **HHX** could be a strong choice.

If you like tech, engineering, or science:

 **HTX** is a great fit.

If you prefer to get job skills and enter the workforce sooner:

 **EUD** or even **EUX** (which mixes vocational training + academic learning) would be perfect.

Would you like help figuring out your interests or talking through career ideas? I can also suggest some fun career tests or tools used in Denmark.
