

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Myanmar. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish.

What educational path would you recommend for me?

Thanks for sharing that — and congratulations on finishing primary school!

In Denmark, after completing **primary/lower secondary school (Folkeskole)**, you have several good educational paths depending on your interests, strengths, and future goals. Here's a breakdown of your main options, along with some guidance to help you choose what suits you best:

🎓 1. General Upper Secondary Education (Gymnasiale Uddannelser)

These prepare you for university and other higher education.

- **STX (Studentereksamen):** Broad academic focus — good if you like subjects like Danish, history, science, and languages.
- **HHX (Higher Commercial Examination):** Focus on business, economics, marketing — great for future business studies.
- **HTX (Higher Technical Examination):** Focus on technology, natural sciences, and IT — good if you're interested in engineering or science.
- **HF (Higher Preparatory Examination):** A shorter, 2-year program — good if you want more flexibility and fewer years in school.

🧠 **Good if:** You enjoy studying academic subjects, might want to go to university later, or don't yet know exactly what you want to do.

🔧 2. Vocational Education and Training (Erhvervsuddannelse – EUD/EUX)

These combine school with apprenticeships in real companies. You'll learn a trade and often get paid during your training.

- Examples: Carpenter, electrician, hairdresser, chef, mechanic, social and healthcare assistant, etc.
- **EUX:** A combination of vocational training and academic subjects — lets you both get a trade and qualify for university.

🔧 **Good if:** You prefer hands-on learning, want to start working sooner, or are interested in a specific job/trade.

💛 Considerations Based on Your Background

Since you're fluent in Danish and born in Denmark, you already have a strong foundation. A few extra things to think about:

- **Community support:** If you're balancing two cultures (Danish and Burmese), it might be nice to choose a school with diversity and support.
- **Parental expectations:** Your parents might value certain types of education (university, practical skills, stability), so it's good to talk openly with them.
- **Interests & strengths:** Think about what subjects you like, how you learn best (theory vs. practice), and what kind of work you might enjoy in the future.

✓ How to Decide?

Here's a small checklist to help you decide:

Question	If "Yes", consider
Do you enjoy school subjects and want to keep studying?	STX, HHX, HTX, HF
Do you want to work with your hands or in a specific trade?	EUD
Do you want both a trade and the option to go to university?	EUX
Do you like business, marketing, or economics?	HHX
Are you interested in technology or science?	HTX
Do you want a shorter school path?	HF, EUD

📌 Final Advice

At 16, it's totally normal not to have everything figured out. If you're unsure, you can:

- Visit **educational counselors (UU-vejledning)** — they can help guide you.
- Go to **open house events (Åbent hus)** at local schools.
- Try a **"brobygning"** (bridge-building) program to test different educations before you decide.

Would you like me to help you explore what might fit you based on your interests and skills? I can ask a few quick questions and give you a more personalized recommendation.
