

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Myanmar. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a big and important decision you're facing — and it's great you're thinking about your future early. Since you've just finished primary school in Denmark, you're probably looking at options like:

The Danish Education System – Your Next Steps After Primary School (Folkeskole)

In Denmark, after 9th or 10th grade (which I assume you've just completed), your main options are:

1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are great if you're interested in going to university later:

STX – Studentereksamen

- More academically focused, includes humanities, science, and social studies.
- Good if you're still exploring what interests you or aim for university.

HHX – Higher Commercial Examination Programme

- Focus on business, economics, marketing.
- Great if you're interested in business or entrepreneurship.

HTX – Higher Technical Examination Programme

- Focus on science, technology, and innovation.
- Ideal if you like subjects like math, IT, or engineering.

HF – Higher Preparatory Examination

- Shorter (2 years), more flexible.
- Good for adults or those who want a less traditional route.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

- You combine school with hands-on experience at a company (apprenticeship).
- Great if you want to become a carpenter, electrician, chef, hairdresser, IT support tech, etc.
- Shorter path to a career and you earn money while learning.

3. Kombineret Ungdomsuddannelse (KUU) or Produktionsskole

- These are more practical/preparatory routes for students who need more time or hands-on learning before choosing a final direction.

How to Choose?

Ask yourself a few questions:

What are you interested in?

- **Do you love books, writing, thinking about society or science?** → STX or HF.
- **Are you curious about how things work – like machines, computers, or labs?** → HTX.
- **Do you dream of running a business or like working with money and markets?** → HHX.
- **Would you rather learn by doing and get into a job sooner?** → EUD (vocational).

What kind of environment suits you?

- Big schools with academic focus → Gymnasiale uddannelser.
- Smaller classes, more practical → Vocational training or production schools.

As someone with a multicultural background

Your bilingualism and cultural understanding are **big strengths**. You could later look into careers in:

- **Healthcare, education, or social work** (where cultural awareness is important)
- **Business or international relations** (if you like languages and travel)
- **Tech or engineering** (if you're interested in practical or scientific work)

Final Tips:

- Visit **open house events (åbent hus)** at local schools.
- Talk to a **UU-vejleder (educational counselor)** – they're available for young people like you.
- Consider starting in **10th grade (10. klasse)** if you're unsure and want more time.

If you'd like, tell me more about what you enjoy (subjects, hobbies, dream jobs), and I can give more personal recommendations.
