

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Namibia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing that! Since you've just finished primary school in Denmark (which ends at around 9th or 10th grade depending on your school), you now have several good options to choose from in the Danish education system. Here's a breakdown to help you think through your decision:

🎒 1. Gymnasiale Uddannelser (General Upper Secondary Education)

If you're interested in going to university later or you enjoy academic subjects like math, languages, science, or social studies, this is a good path.

You have a few different types to choose from:

- **STX (Studentereksamen)** – Broad academic focus, includes humanities, natural sciences, and social sciences.
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and international trade.
- **HTX (Højere Teknisk Eksamen)** – Focus on technology, natural sciences, and innovation.
- **HF (Højere Forberedelseseksamen)** – A shorter (2-year) program, often for older students or those who want a less traditional path to university.

👉 **Recommended if:** You want to go to university or keep your options open.

🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

If you're more into practical work, want to start earning earlier, or enjoy learning by doing, this could be great. These programs combine school and apprenticeship.

Examples:

- Electrician
- Carpenter
- Hairdresser
- Social and health care assistant (SOSU)
- IT Support

You can still go on to higher education later via **EUX** (a combination of vocational and academic education).

👉 **Recommended if:** You prefer hands-on learning or want a faster route into the job market.

💡 3. EUX – The Hybrid Option

This is a combination of vocational training and a studentereksamen (STX-level education). You become both skilled in a trade and qualified for university.

👉 **Recommended if:** You want both job skills and the option to go to university later.

🧠 Extra Note – Your Background:

Being bilingual (Danish + any other language from Namibia like Oshiwambo, Afrikaans, or German?) could be a strength in areas like:

- International trade (HHX)
 - Diplomacy or global studies (STX with social science focus)
 - Health and social care, especially in multicultural settings
-

🕒 How to Decide?

Ask yourself:

- Do I like school and studying theory? → **Gymnasiale path (STX, HHX, HTX, HF)**
 - Do I want to start working sooner or learn a trade? → **Vocational path (EUD or EUX)**
 - Am I unsure? → Consider visiting **UddannelsesGuiden.dk** or talking to an **UU-vejleder** (youth education counselor) – every municipality in Denmark offers free guidance.
-

If you tell me more about:

- Your favorite school subjects
- What kind of job or life you imagine in the future
- Whether you prefer academic or practical learning

...I can give you a much more specific recommendation.
