

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Nauru. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that! Since you're 16, just finished primary school, and fluent in Danish, you're at a key moment to decide on a path that fits **your interests, strengths, and future goals**. Denmark has a flexible and supportive education system, and you've got several good options. I'll walk you through the main ones, then offer tailored advice based on common goals.

🎓 Main Educational Paths After Primary School in Denmark

After primary school (folkeskole), Danish students typically choose one of the following:

1. Gymnasium (STX, HHX, HTX, HF) – General or Specialized Upper Secondary Education

These are 2-3 year programs that prepare you for university.

- **STX** (Almen studentereksamen): Broad academic program, great if you like humanities, sciences, or languages.
- **HHX** (Højere handelseksamen): Business-focused, good if you're into economics, marketing, or entrepreneurship.
- **HTX** (Højere teknisk eksamen): Technical/science-heavy, ideal if you're into IT, engineering, or natural sciences.
- **HF** (Højere forberedelseseksamen): 2-year general education, often for older or more practically oriented students. Can be good if you want a quicker route to higher education or mid-level jobs.

✅ Choose **gymnasium** if:

- You enjoy academic subjects
- You're considering university
- You want to keep your options open

2. EUD / EUX – Vocational Education and Training

Practical, career-focused education combining school and apprenticeship. Usually 2-4 years.

- **EUD**: Prepares you directly for a job (e.g., carpenter, electrician, hairdresser, chef).
- **EUX**: Combines vocational training with a high school diploma – gives access to both jobs and universities.

✅ Choose **EUD/EUX** if:

- You like hands-on work or have a specific trade in mind
 - You want a faster path to a job
 - You still want the option to go to university later (with EUX)
-

Personal Recommendations Based on Your Profile

Since you:

- Are fluent in Danish
- Finished primary school (probably 9th or 10th grade)
- Are 16 years old
- Have a multicultural background (which is a strength!)

Here are 3 common paths I'd suggest:

♦ Option 1: STX or HHX Gymnasium

- Best if you're curious, academically capable, and not sure what career you want yet.
- If you're interested in **business, economics, or global issues**, HHX could be very interesting – especially with your Nauruan heritage, which could make international perspectives more engaging for you.

♦ Option 2: EUX – Best of Both Worlds

- Perfect if you like practical skills *and* want to keep the door open for future university study.
- Popular among students who like learning by doing and don't want to sit behind a desk all day.

♦ Option 3: HF

- If you want a shorter 2-year program that can lead to higher education.
 - Especially good if you're ready to move into working life or specific training more quickly.
-

How to Decide?

Ask yourself:

- Do I like school and studying for exams?
 - Do I enjoy working with my hands or creating things?
 - Am I interested in starting work soon, or do I want to study more?
 - What subjects do I enjoy most?
-

Next Steps

1. **Talk to your school counselor (UU-vejleder)** – They'll help you figure out what programs are available near you.
 2. **Visit schools on open house days (Åbent Hus)** – Get a feel for the atmosphere.
 3. **Try a "brobygning" (intro program)** – You can spend a few days at a gymnasium or vocational school to try it out.
-

If you tell me more about your interests (like favorite school subjects, dream jobs, or hobbies), I can help narrow down the best path even more.
