

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Nauru. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background — it's great that you're thinking seriously about your next steps. Since you've just finished primary school in Denmark (which typically ends around 9th or 10th grade), you now have several educational paths to choose from depending on your interests, goals, and how you like to learn.

Here's a breakdown of the **main educational options** available to you in Denmark after primary school:

1. Gymnasium (STX, HHX, HTX) – Upper Secondary School

This is a natural path if you're thinking about university later.

- **STX (Alment Gymnasium):** Focuses on general academic subjects like Danish, English, history, science, and more. Good if you're not sure what you want yet.
- **HHX (Business Gymnasium):** Focus on business, economics, and marketing. Great if you're interested in business or want to work in finance or marketing.
- **HTX (Technical Gymnasium):** Focus on science, technology, engineering, and math (STEM). Ideal if you're into tech, science, or engineering.

 **Recommended if:** You enjoy academic learning, are considering university later, or want to keep your options open.

2. EUD (Erhvervsuddannelse) – Vocational Education

A mix of school and apprenticeship, leading to skilled jobs (e.g., electrician, chef, hairdresser, mechanic).

- You learn both in a classroom and through hands-on experience at a workplace.
- Takes 3–5 years depending on the trade.
- You earn money during your apprenticeship.

 **Recommended if:** You prefer practical work over classroom study and want to start working in a skilled trade earlier.

3. EUX – Combination of Gymnasium and Vocational

This is a hybrid that gives you both a **studentereksamen** (like gymnasium) **and** a vocational qualification.

- You can both go to university and work in a skilled trade.

- It's a longer program (around 4–5 years), but gives you maximum flexibility.

 **Recommended if:** You want the option of both working in a trade and potentially studying further.

4. 10th Grade (Tiende Klasse)

Some students choose to take an extra year after 9th grade to grow academically or personally.

- You can do it at a regular school or an **efterskole** (a boarding school with a special focus — sports, arts, tech, etc.)
- Good for improving your academic skills or exploring interests before deciding.

 **Recommended if:** You're unsure about your next step or want a year to develop socially or academically.

How to Choose?

Here are a few questions to help guide you:

1. **Do you enjoy academic subjects?** If yes, Gymnasium might be best.
 2. **Do you like hands-on learning and want to work sooner?** EUD or EUX could suit you.
 3. **Are you unsure what to do next?** A 10th-grade year at an efterskole might give you time to explore.
-

Suggested Next Step:

Since you're just finishing primary school and you're fluent in Danish, you're in a strong position. Here's what I suggest:

Step-by-step suggestion:

1. **Reflect:** What subjects or activities do you enjoy most?
 2. **Research local schools:** Visit open houses or websites for nearby STX, HHX, HTX, EUD, and EUX programs.
 3. **Talk to a guidance counselor (UU-vejleder):** Every kommune offers this for free.
 4. **Consider trying 10th grade if unsure** — especially at an efterskole to explore your interests.
-

If you tell me more about your interests (e.g., what subjects you like, whether you enjoy working with people, computers, hands-on tasks, etc.), I can give more personalized advice!
