

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Nepal. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing that — it sounds like you're at an exciting turning point. In Denmark, after primary school (folkeskole), you have several options depending on your interests, strengths, and future goals. Here's a breakdown of the main educational paths you can consider, with some guidance to help you choose:

🎓 1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are 3-year programs that prepare you for higher education (university, professional bachelor, etc.).

Options:

- **STX** (Studentereksamen): Broad academic focus — good if you enjoy subjects like Danish, history, science, languages, etc.
- **HHX** (Higher Commercial Examination): Focus on business, economics, and marketing — great if you're interested in finance, entrepreneurship, or working in business.
- **HTX** (Higher Technical Examination): Focus on science, technology, and IT — ideal if you like subjects like math, physics, biology, or tech.
- **HF** (Higher Preparatory Examination): A 2-year option, more practical and flexible — good if you're unsure what you want but still want access to higher education.

● Recommended if:

You're academically inclined, enjoy learning in a school environment, and want the option to go to university or college later.

🔧 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

A combination of school and apprenticeship, often leading directly to a job.

Areas include:

- Healthcare (e.g. SOSU assistant)
- Electrician, carpenter, plumber, etc.
- Hairdressing, hospitality, or retail
- IT, media, and more

● Recommended if:

You prefer hands-on work, want to earn money while you study, and aim to start working earlier. You can still pursue further education later (e.g. via EUX or adult education).

⚙️ 3. EUX (Vocational + Academic Combo)

This is a hybrid where you both learn a trade **and** get a study qualification like in gymnasium.

● Recommended if:

You want the best of both worlds — a job qualification and the option for university later.

🎯 How to Decide?

Ask yourself:

- Do I prefer academic subjects or practical skills?
 - Do I want to work as soon as possible or go to university?
 - What subjects do I enjoy most?
 - Do I like working with people, with my hands, or with ideas?
-

🌍 Being of Nepali Background

This is a strength! Being bilingual and bicultural can open opportunities in:

- International business
 - Healthcare (multilingual care is valuable)
 - Education or translation
 - Tech (very global field)
 - NGOs or development work
-

✅ My Suggestion (based on what you've said):

Since you're fluent in Danish, born and raised here, and just finished folkeskole, I'd suggest you **strongly consider STX, HTX, or EUX**, unless you're already passionate about a trade.

If you're unsure, **visit open house events (åbent hus)**, try a **"brobygning" (bridge-building program)**, or even speak with a school counselor (UU-vejleder). You don't have to decide everything now — you can change later too.
