

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Netherlands. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you're 16, living in Denmark, just finished primary school, and are fluent in Danish, you're at an important crossroads where you can choose from several solid educational paths. Here are the main options in Denmark after **Folkeskole (primary/lower secondary school)**:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education – Academic)

This is the most common path if you're interested in going to university later.

Options:

- **STX (Studentereksamen)** – General upper secondary education (broad focus: humanities, sciences, and social sciences).
- **HHX (Højere Handelseksamen)** – Business-oriented, good if you like economics, marketing, or entrepreneurship.
- **HTX (Højere Teknisk Eksamen)** – Tech/science-oriented, great for engineering, IT, and natural sciences.
- **HF (Højere Forberedelseksamen)** – 2-year general education, more flexible, often for slightly older students or those wanting a faster route.

Best if: You like academic subjects and are thinking about university later on.

🔧 2. Erhvervsuddannelse (Vocational Education and Training – EUD)

A hands-on path combining school and apprenticeship. You learn a trade and often get paid during your apprenticeship.

Fields include:

- Carpenter, Electrician, Chef, Hairdresser
- IT Supporter, Health Care Assistant
- Mechanics, Design & Media, etc.

Best if: You prefer learning by doing, want to work sooner, or are passionate about a specific trade or craft.

💡 3. Kombinerede forløb (Combined Programs)

Some schools offer **EUX**, a mix of vocational training + upper secondary education. You can both **work in a trade and qualify for university** later.

Best if: You want both practical skills and the option for higher education.

🌍 4. Efterskole or International Experience

Some 16-year-olds take a year at an **efterskole**, which can help with personal development, language skills, or exploring arts/sports/tech. Alternatively, you might consider a **year abroad** in the Netherlands or another country — which could help connect with your heritage and build international experience.

My Recommendations (based on what you shared):

- If you're **academic and unsure about career goals**, **STX** or **HHX** are excellent.
 - If you're **hands-on or already know you like a specific job type**, explore **EUD** or **EUX**.
 - If you're still unsure and want personal growth first, an **efterskole year** could give clarity.
