

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Nicaragua. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you've just finished primary school in Denmark (which typically ends at 9th or 10th grade), you're at a key decision point. In Denmark, there are several common educational paths after primary school, and your choice should depend on your **interests**, **goals**, and **learning style**. Here's a breakdown of your main options, along with who each path is best suited for:

1. Gymnasium (STX, HHX, HTX) – General Upper Secondary Education

Duration: 3 years

Goal: Prepares you for university

Best for: Students who want to pursue higher education

- **STX (Almen studentereksamen):** Focus on general subjects like Danish, history, sciences, and languages.
Best if you're not sure yet what you want to study at university.
- **HHX (Højere handelseksamen):** Focus on business, economics, marketing.
Good if you're interested in business or international trade.
- **HTX (Højere teknisk eksamen):** Focus on science, technology, IT.
Best for tech-savvy students or those considering engineering.

2. EUX or EUD – Vocational Education and Training

Duration: 2–4 years (depending on the path)

Goal: Learn a trade or get a skilled job (with or without the option to go to university)

Best for: Hands-on learners who want a job-oriented path

- **EUD (Erhvervsuddannelse):** Direct vocational training (e.g., electrician, chef, carpenter).
You'll get work experience early and can start earning quickly.
- **EUX:** A combination of EUD and a gymnasium-level education.
Gives you both a trade and the option to go to university later.

3. International or Alternative Programs

- **IB (International Baccalaureate):** Taught in English, internationally recognized.
Good for students with global ambitions or strong English skills.

- **Efterskole (optional):** A 10th grade year with a mix of school and personal development. *Often includes music, sports, or international focus – a chance to grow socially and personally.*
-

How to Decide?

Ask yourself:

- Do I enjoy academic subjects and want to go to university? → **STX/HHX/HTX/IB**
 - Do I prefer practical, hands-on learning? → **EUD or EUX**
 - Do I want a year to explore myself, maybe improve academically or socially? → **Efterskole or 10th grade**
 - Am I already passionate about something (tech, cooking, design, cars, etc.)? → **Look into vocational programs in that area**
-

As someone with a multicultural background...

You have a unique advantage: cultural understanding, bilingual roots (if you speak Spanish), and adaptability. These are valuable in fields like:

- **International business (HHX → business studies)**
 - **Education or social work (STX → university)**
 - **Tourism, translation, or diplomacy (STX or IB → university)**
-

If you'd like, I can help you narrow it down based on your **interests** or **career ideas**. Want to share what you enjoy or dream of doing?
