

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Niger. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that — it's great that you're thinking carefully about your future. Since you're 16, born and raised in Denmark, and have just finished **primary school (folkeskole)**, your next step depends on your **interests**, **grades**, and **future goals** (job, studies, lifestyle). Here's a breakdown of your main options in Denmark and some guidance to help you choose:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education)

These are academic paths that prepare you for university.

♦ STX – Studentereksamen

- **General academic focus**, including humanities, science, and social science.
- Good if you want to keep your **options open** for university.
- Popular and broad.

♦ HHX – Higher Commercial Examination

- Focus on **economics, business, and marketing**.
- Great if you're into **entrepreneurship**, finance, or want to study business later.

♦ HTX – Higher Technical Examination

- Focus on **science, technology, and engineering**.
- Best if you like **math, science, tech, or design**.

♦ HF – Higher Preparatory Examination

- A **shorter 2-year** program.
- Good if you want to go to **university colleges** or need a more flexible program.
- Often used as a second chance or if you prefer **less traditional learning environments**.

✅ Choose gymnasiale if you're interested in continuing to **university or university college** later on and enjoy studying theory.

🔧 2. Erhvervsuddannelser (Vocational Education & Training - VET)

These programs combine school and **apprenticeship (praktik)** in a real job.

- Become a **carpenter, electrician, hairdresser, chef, IT-supporter**, etc.
 - Takes 2–5 years depending on the field.
 - You **earn money** during your apprenticeship.
- ✓ Choose this if you prefer **hands-on work** and want to get into the job market more quickly.

3. Kombinerede forløb / EUD + EUX

- **EUX** mixes vocational education with **academic studies** – you get both a trade and the option to go to university.
 - Example: You train to become an **IT-supporter**, but can later study **computer science** at university.
- ✓ Choose this if you like **both practical work and academic subjects**.

What Should You Think About?

Here are some questions to help guide you:

- Do you enjoy studying subjects like **math, languages, science**?
- Are you more **hands-on**, creative, or technical?
- Do you want to **start working soon**, or are you okay with **studying longer**?
- Do you want to study at a **university or university college** in the future?

My Recommendation (based on what you shared):

Since you're fluent in Danish, finished folkeskole, and are in Denmark's system:

- If you're **curious and want to keep many doors open** → consider **STX or EUX**.
- If you're into **tech or science** → look into **HTX or EUX (tech field)**.
- If you want to start earning and working earlier → check out **EUD programs**.

If you'd like, I can also suggest **specific schools or programs near you** if you tell me where in Denmark you live (city or region) and what subjects or fields interest you (tech, business, healthcare, etc.).

Would you like help with that?
