

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Niger. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself — it's great that you're thinking carefully about your next step. Since you've just finished **primary school in Denmark**, that means you're likely about to start or choose a direction in the **ungdomsuddannelse** (youth education) phase, which is typically for people aged 15-20 in Denmark.

Here's a breakdown of your **main options**, based on your background and potential interests:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are good if you want to go to university later.

- **STX (Almen studentereksamen)**: Focuses on a broad academic education – humanities, science, social science.
- **HHX (Højere handelseksamen)**: Focuses on business, economics, marketing.
- **HTX (Højere teknisk eksamen)**: Focuses on technical and natural sciences – good if you're into tech, IT, or engineering.
- **HF (Højere forberedelseseksamen)**: Shorter, 2-year version of STX. Often for those who want a more practical route to further education.

Recommended if:

- You like school-style learning (reading, writing, theory).
- You're interested in university or professions like doctor, lawyer, engineer, teacher, etc.

2. Erhvervsuddannelser (Vocational Education and Training / VET)

This is a good path if you want to learn a trade and start working earlier – but you can also take further education afterward.

- Examples: Electrician, carpenter, hairdresser, chef, mechanic, social and health worker (SOSU).
- Dual structure: time spent at school **and** in a paid apprenticeship.

Recommended if:

- You like practical, hands-on work.
- You want to earn money while learning.

- You're considering a job straight after or want an alternative path to higher education.

3. Kombinerede forløb eller 10. klasse (if needed)

If you feel unsure or want to boost your skills (like math, Danish, or English), some people take:

- **10. klasse:** Extra year to improve grades or decide on a path.
- **EUD10 or kombineret ungdomsuddannelse (KUU):** Focused on getting you ready for a vocational or academic path.

How to Choose?

Ask yourself:

1. **Do I enjoy academic school subjects, or do I prefer practical work?**
2. **Do I want to go to university later? Or start working sooner?**
3. **What are my interests?** (Tech? Healthcare? Business? Crafts? Helping people?)

✨ Suggestions Based on Common Strengths for Bilingual/Diverse Youth

- **HTX or HHX:** If you like tech or business and want a strong academic foundation.
- **VET (EUD) with focus on IT, mechanics, or social care:** Great if you like real-world skills and want to get paid during training.
- **HF:** Good balance if you're not into long school paths but still want options later.

Final Tips:

- Visit **uddannelsesguiden.dk (UG.dk)** to explore paths and watch videos about different programs.
- Talk to a **study and career counselor (Studievejleder)** at your school or your local **UU-vejledning** office — they'll help you map your strengths and interests.
- Don't worry if you're unsure now. The Danish system allows for flexibility and changing paths later.

Would you like a recommendation based on your **interests** or **what you're good at**? I can help you narrow it down more.
