

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from North Macedonia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! It's great that you're thinking carefully about your next step—this is an important turning point. Since you've just finished **primary school** (in Denmark, that means **folkeskole**, usually ending after 9th or 10th grade), here are the most common educational paths available to you and some guidance to help you choose:

🎓 Main Options After Primary School in Denmark:

1. Gymnasiale uddannelser (Upper Secondary Education – General)

These are for students aiming for **university or other higher education**. They usually last 3 years.

- **STX (Studentereksamen)** – General upper secondary, broad range of subjects (science, humanities, social sciences).
- **HHX (Higher Commercial Exam)** – Focus on business, economics, and international subjects.
- **HTX (Higher Technical Exam)** – Focus on science, technology, and innovation.
- **HF (Higher Prep Exam)** – Shorter (2 years), more practical, and for students who want flexibility.

Choose this path if:

- You enjoy academic subjects.
- You're thinking about university later.
- You want to keep your options open.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

This is more hands-on and prepares you for a **specific career** (like electrician, carpenter, chef, hairdresser, etc.).

- Often includes **apprenticeships (praktik)**.
- You can also take the **EUX**, which combines vocational training with general upper secondary subjects, giving you access to university later.

Choose this path if:

- You like practical work and learning by doing.
- You want to start working earlier.

- You're interested in trades or specific professions.

How to Choose the Right Path

Here are some questions to ask yourself:

- **Do you like academic studies, or prefer hands-on learning?**
- **Do you have an idea of what job or field you'd like to work in?**
- **Do you want to go to university later?**
- **Do you want to earn money earlier?**

Some Personal Advice for You

Since you're fluent in Danish and grew up in Denmark, you have **all the same opportunities** as anyone else. Being from a North Macedonian family is a strength—it can give you extra cultural perspective, language skills, and possibly career advantages (e.g., in international work or language-based roles).

If you're **not yet sure what you want**, consider choosing **STX or HHX**, as they keep your future options wide open. You can always specialize or shift direction later.

Next Steps You Can Take

- **Visit your local ungdomsuddannelse vejleder (youth education counselor)** – They can help match your interests with the right path.
- **Try an "intro course"** – Many schools offer 1-week intro programs where you can try gymnasial or vocational paths before deciding.
- **Talk to friends, family, or others who've taken different paths** – Real experiences are helpful.

If you want, I can help you **compare specific schools near you**, or go over your **interests and strengths** in more detail to give a more personalized recommendation. Just let me know!
