

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from North Macedonia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background—it's great that you're thinking ahead about your future. Since you've just finished primary school in Denmark (which ends after 9th or 10th grade), your next step typically involves choosing a **youth education program**. Denmark offers a few main paths depending on your interests, skills, and future goals.

Here's a breakdown to help you decide:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These programs are for students who want to continue to **university or higher education** after 3 years. Good for students who enjoy academic subjects.

Options include:

- **STX (Almen studentereksamen)** – Broad academic focus (science, humanities, languages).
- **HHX (Højere handelseksamen)** – Focus on business, economics, and marketing.
- **HTX (Højere teknisk eksamen)** – Focus on science, technology, and innovation.
- **HF (Højere forberedelseksamen)** – 2-year program, a bit less theoretical, often for slightly older students or those who want a quicker route to higher education.

✓ **Choose this if** you like school subjects and might want to go to university.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These are practical programs combining school and paid internships in real companies. You become qualified to work in a skilled trade.

Examples:

- Electrician, carpenter, hairdresser, chef, mechanic, healthcare assistant, etc.

✓ **Choose this if** you prefer learning by doing and want to start working faster.

3. EUX (Combination of EUD + Gymnasium)

A newer, more demanding option that gives you both **vocational training** *and* a **study-competence certificate**—so you can work right away *or* go to university.

✓ **Choose this if** you want flexibility: both hands-on skills *and* the option to study further.

Tips to Choose the Right Path

1. **Think about your interests** – What subjects or activities do you enjoy most?
2. **Talk to a guidance counselor** (Studievejleder) – They're available in most schools and UU-centers and can help you match your interests with a program.
3. **Try “brobygning” or intro courses** – Many schools offer short visits to try different programs before you commit.
4. **Look at your long-term goals** – Do you see yourself working soon, or studying more?
5. **Use online tools** – Websites like ug.dk (official Danish education site) help you explore all options.

Based on Your Profile

Since you're fluent in Danish, born in Denmark, and have completed primary school, **you have full access to all education paths.**

If you're unsure:

- **STX or HHX** are good general choices if you like academic learning and want to keep your options open.
- If you prefer something more practical and job-oriented, try **EUD** or **EUX**.
- If you enjoy technology or science, **HTX** might be a great fit.

Would you like me to suggest specific schools or programs near where you live in Denmark? I can help narrow it down if I know your town or region.
