

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Palau. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great point in life to be reflecting on your options — and it's awesome that you're thinking ahead! In Denmark, after finishing **folkeskole** (primary and lower secondary education), you have several good pathways depending on your interests, strengths, and future goals. Since you're 16, you're at the typical age to start **youth education** (*ungdomsuddannelse*). Here's a breakdown of your main options and what might fit you best:

🎓 1. Gymnasiale uddannelser (General upper secondary education)

These are academic programs that prepare you for university.

- **STX (Studentereksamen)**: Broad and academic, with focus areas like science, social science, or humanities. Great if you're not sure yet what you want to study later.
- **HHX (Higher Commercial Exam)**: Focuses on business, economics, marketing, and languages.
- **HTX (Higher Technical Exam)**: Focus on technology, science, and IT.
- **HF (Higher Preparatory Exam)**: Shorter (2 years) and more practical; for students who want to continue to university but prefer a more applied focus.

✅ **Recommended if** you enjoy studying, want to keep your options open, and might go to university later.

🔧 2. Erhvervsuddannelser (Vocational education and training – VET)

These combine school and apprenticeship and prepare you directly for a job.

- You train for careers like electrician, mechanic, hairdresser, chef, social worker, healthcare assistant, etc.
- You get real work experience with a company.
- After finishing, you can either start working or take *eux*, which gives you the option to continue studying (even university later).

✅ **Recommended if** you like hands-on work, want to enter the job market quickly, or like the idea of earning money while studying.

💡 Things to Consider:

- **What subjects did you enjoy in school?** Were you more into math, science, languages, or creative subjects?
 - **Do you like practical work or studying theory?**
 - **Do you want to go to university later?** Or do you want to get a job soon and maybe study later?
-

Cultural background – advantage!

Being Danish with Palauan roots gives you a unique perspective and could be an asset in areas like:

- **International business** (HHX)
- **Tourism and hospitality**
- **Healthcare or social work** (VET)
- **Language/cultural education** or even **public service**

If you speak English well (which you probably do), that opens even more doors in global careers.

My Personal Suggestion:

If you're not 100% sure yet what you want, **STX or HF** are great flexible choices. You'll have 2–3 years to discover your interests more deeply. If you're more into practical work and earning while learning, look into a **VET program with EUX** — it gives you both a skilled trade and an academic qualification.

Would you like help comparing specific schools or programs in your area? Or do you want to take a short quiz to explore what fits your personality and strengths?
