

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Peru. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! Since you're 16 and just finished **primary school** (folkeskolen) in Denmark, you're at an important transition point. In Denmark, your typical next step is **youth education (ungdomsuddannelse)**. Your options depend on your interests, strengths, and future plans. Here's a breakdown to help you choose:

🎓 1. General Upper Secondary Education (Gymnasiale uddannelser)

These are more academically focused and prepare you for **university** later on.

- **STX (Studentereksamen):** General high school with a broad mix of subjects (humanities, science, languages, social science). Great if you're not sure what you want yet.
- **HHX (Higher Commercial Exam):** Focus on **business, economics, marketing**. Good if you're into business or want to work in a company or start one.
- **HTX (Higher Technical Exam):** Focus on **technology, science, and innovation**. Ideal for future engineers, programmers, designers.
- **HF (Higher Preparatory Exam):** A shorter 2-year program, more flexible. Good if you want to move on quickly or need a second chance path.

💡 Good for you if: You enjoy theoretical school subjects and might want to study at university later.

🔧 2. Vocational Education and Training (EUD - Erhvervsuddannelse)

More **practical and hands-on**. You learn a trade and often combine school with apprenticeship.

Examples of paths:

- Electrician
- Carpenter
- Chef
- Health and care worker
- Hairdresser
- Mechanic

💡 Good for you if: You prefer **learning by doing**, want to start working sooner, or are passionate about a specific skill or craft.

How to Choose?

Here are a few questions to help you reflect:

- Do you like school subjects and reading, or prefer practical work?
- Are you thinking of going to university one day?
- Do you want to start working earlier and learn a profession?
- Are you interested in business, tech, healthcare, design, or something else?

Personal Note

Since you're fluent in Danish and were raised in Denmark, you're well-equipped to succeed in any Danish youth education path. Your **Peruvian background** can also be a **big strength**—perhaps in future language work, cultural exchange, international business, or even Latin American studies.

Suggestion: Next Step

1. **Visit an educational guidance center (Studievalg or UU-vejledning)** — they can give you personal advice.
2. **Talk to teachers or a school counselor** — they know your strengths.
3. **Try an “intro course” (brobygning)** — most 9th/10th grade students can try different educations before choosing.
4. **Consider a 10th grade** if you're unsure — it gives you more time to decide.

If you want, I can help you explore specific programs in your area (by city or interest). Would you like that?
