

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Philippines. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! Since you've just finished primary school in Denmark and are thinking about your next step, you have a few solid options depending on your interests, goals, and how you like to learn. Here's a breakdown of your main educational paths in Denmark at this stage, along with some suggestions to help you decide:

1. Gymnasiale uddannelser (Upper Secondary Education)

These are the most common paths if you want to continue to university later.

STX (Studentereksamen)

- Focus: Broad academic education – humanities, natural sciences, and social sciences.
- Good if you like theory and general knowledge.
- Leads to all types of higher education.

HTX (Teknisk studentereksamen)

- Focus: Technology, science, and innovation.
- Great if you're interested in STEM (science, technology, engineering, math).
- Opens doors to technical and scientific university programs.

HHX (Handelstudentereksamen)

- Focus: Business, economics, and international trade.
- Good if you're interested in working in business, marketing, finance, or starting a company.
- Also accepted for university, especially business schools.

IB (International Baccalaureate)

- Taught in English, internationally recognized.
- Great if you might want to study or work abroad later.
- Demands strong academic skills and independence.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

If you prefer learning through hands-on work and want to start a career sooner.

- You train to become, for example, an electrician, carpenter, hairdresser, chef, or health care assistant.
- Often includes a mix of school and internships (praktik).
- After some programs, you can also go to higher education (like **EUX**, which combines vocational training with academic subjects).

What should *you* consider?

Ask yourself:

1. **Do I like school and academic subjects?**
→ Go for **STX**, **HTX**, **HHX**, or **IB**.
2. **Do I prefer learning by doing and starting work earlier?**
→ Consider **EUD** or **EUX**.
3. **Do I already know what I want to work with in the future?**
→ Choose a path that gets you there – for example, HTX for engineering, HHX for business, EUD for practical jobs.
4. **Would I like to go to university later on?**
→ Then choose a gymnasial uddannelse (like STX, HTX, HHX) or **EUX**.

Personal tip (from your background):

Being fluent in Danish, having Filipino roots, and living in Denmark gives you a multicultural perspective – that's a **huge strength** in fields like:

- **International business** (HHX or IB)
- **Healthcare or social work** (EUD or STX → university)
- **Technology or science** (HTX or STX)

Next Steps:

- Visit your local **Uddannelsesvejleder** (educational counselor) – they can give advice specific to your area.
- Attend **open house events** at gymnasiums or technical schools near you.
- Try **Brobygning** (a trial week) to experience what it's like at different schools.

Would you like help deciding between two or three specific programs or schools? Or do you want to explore careers that match your interests first?
