

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Portugal. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a big and exciting step – congratulations on finishing primary school! You're at a point where you can begin shaping your future based on your interests, strengths, and ambitions. In Denmark, after primary school (folkeskole), you typically have a few main educational paths to consider. Here's a breakdown of your options and what might suit you depending on your goals:

1. Gymnasiale uddannelser (Upper Secondary Education)

These are academic paths that prepare you for higher education (like university or university college).

STX (Studentereksamen)

- Focus: Broad academic subjects (science, humanities, social sciences).
- Best for: Students who enjoy traditional school subjects and want to go to university.
- Duration: 3 years.

HTX (Teknisk Gymnasium)

- Focus: Science and technology (engineering, IT, etc.).
- Best for: Students interested in tech, science, or innovation.
- Duration: 3 years.

HHX (Handelsgymnasium)

- Focus: Business, economics, marketing, and international trade.
- Best for: Students who might want to study business or start a company.
- Duration: 3 years.

HF (Højere Forberedelseseksamen)

- Focus: More practical and flexible, fewer subjects.
- Best for: Students who want a shorter, more focused route to further education.
- Duration: 2 years (but you typically need to be at least 17).

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

- Focus: Hands-on skills and training in a specific trade (e.g., electrician, chef, carpenter, hairdresser).
- Best for: Students who want to start working sooner and prefer practical work.
- Duration: Varies, but typically 3-4 years, with both school and apprenticeship.

3. Kombineret Ungdomsuddannelse (KUU)

- For young people who need a more flexible, personalized program.
- Combines practical experiences, internships, and school.
- Good if you're unsure about school or need more time to figure out your direction.

What to Think About

Ask yourself:

- Do I enjoy studying and want to go to university?
- Do I prefer learning by doing and want to get a job faster?
- Am I interested in business, technology, health, or creative fields?
- Do I want to work in Denmark, Portugal, or internationally?

Your Portuguese Background

Your bilingual and bicultural identity is a strength:

- HHX might be great if you're interested in international business.
- STX could be good if you're academically curious and may study languages or international studies.
- Your Portuguese could help if you ever consider studying or working in Portugal or for international companies.

Recommendation Example

If you like school and want to keep your options open: **STX or HHX**.

If you prefer hands-on work and want a job faster: **EUD**.

If you're still unsure: Talk to a **UU-vejleder (youth education counselor)** at your local school or kommune. They can help you explore your options and even arrange visits to schools.

Would you like help comparing STX/HHX/HTX based on your personal interests? Or are you leaning toward something more practical or creative?
