

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Portugal. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! Since you've just finished primary school in Denmark and you're fluent in Danish, you're in a strong position to explore several educational paths. Here's a breakdown of your options and how to think about choosing the right one for you:

Main Educational Paths After Primary School in Denmark

After 9th or 10th grade, Danish students typically choose between these broad options:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These prepare you for university.

- **STX (Almen studentereksamen):** Focus on a broad mix of science, humanities, and social sciences.
- **HHX (Højere handelseksamen):** Business and economics focus.
- **HTX (Højere teknisk eksamen):** Focus on science and technology.
- **HF (Højere forberedelseseksamen):** Shorter (2 years), for those who want to enter higher education sooner or need a more flexible setup.

 Good if:

- You enjoy academic subjects and might want to go to university later.
- You're not yet sure what job you want and want to keep your options open.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These combine school and apprenticeships and prepare you for specific jobs (e.g., carpenter, electrician, hairdresser, chef).

 Good if:

- You want to start working sooner and like practical learning.
- You have a clear idea of a trade or profession that interests you.

3. Kombineret forløb (EUX)

A combination of vocational training and academic subjects. You get both a vocational qualification **and** the option to go to university later.

 Good if:

- You want a job-focused education but still want the option of university later.
- You're unsure between practical and academic paths.

Choosing the Right Path – Think About:

1. **Interests:** What subjects or activities do you enjoy most?
2. **Strengths:** Are you more academic, creative, technical, or hands-on?
3. **Career ideas:** Any dream jobs or fields you're curious about?
4. **Balance:** Do you want to work sooner, or are you open to more years of study?

Example Scenarios

- If you **like science and math**, consider **HTX**.
- If you're interested in **business or economics**, **HHX** might suit you well.
- If you're thinking about a **practical job**, like a **chef or electrician**, then **EUD** or **EUX** is a great choice.
- If you want to **keep all doors open** and don't know yet what you want, **STX** is the most flexible.

Your Portuguese Background

Being bilingual and bicultural is a **huge asset**. It can open doors in:

- International business
- Tourism and hospitality
- Language teaching
- Working with multicultural communities
- Possibly studying or working in Portugal later

Recommendation

If you're not sure yet, I'd recommend you **visit open house events** (åbent hus) at local schools and **talk to a guidance counselor (Studievejleder)** at your school. They can help you decide based on your grades, interests, and personality.

If you'd like, I can help you figure it out even more by asking:

- What subjects do you like most and least?
- Do you already have any career dreams?
- Would you prefer to work sooner or study longer?

Let me know, and we can make this even more personal.
