

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Portugal. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background! Since you're 16 and just finished primary school in Denmark, the next step typically would be **youth education** ("ungdomsuddannelse"). Denmark has a well-structured system, and your path depends a lot on your **interests**, **academic strengths**, and whether you're more drawn to **theoretical** or **practical** learning. Here are the main options and recommendations tailored to your situation:

♦ 1. Gymnasiale uddannelser (Upper Secondary Education)

These are academic programs preparing you for university.

✅ Recommended if:

- You like school subjects like languages, science, history, or math.
- You think you might want to go to university later.
- You enjoy reading, writing, or learning theory.

Options:

- **STX (Studentereksamen):** Broadest, offers languages, science, social sciences.
- **HHX (Handelsskolen):** Focus on business, economics, and marketing.
- **HTX (Teknisk gymnasium):** Focus on technology, science, and innovation.
- **HF (Højere Forberedelseseksamen):** 2-year program, often for students who want a more flexible or shorter route to higher education.

♦ 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

This path combines **school and apprenticeships** with companies.

✅ Recommended if:

- You prefer hands-on learning.
- You want to start working sooner.
- You're interested in trades (e.g., electrician, carpenter, chef), or fields like healthcare or IT.

You can also take **EUX**, which combines a vocational education with subjects qualifying you for university. It's a great hybrid if you want both job skills and academic options.

◆ 3. 10. klasse (optional extra year)

If you're unsure, you can choose to take an extra year before youth education. It can give you time to mature, improve your skills, or explore options.

Bonus: Your Portuguese background

Being fluent in Danish and having Portuguese roots can be a huge advantage. Consider:

- Studying additional languages (e.g., Spanish, French, English at a high level).
 - Choosing international studies (like IB or HHX with focus on trade/languages).
 - Considering exchange opportunities or Erasmus+ in the future.
-

How to Decide?

Ask yourself:

- Do I like working with my hands or with books?
 - Am I curious about science, business, or technology?
 - Do I want to go to university someday, or start a career earlier?
-

My Suggestions (based on your profile):

- If you're generally academic and open to university later: **STX or HHX**.
 - If you like business, languages, or entrepreneurship: **HHX**.
 - If you're unsure or want flexibility: **HF or 10. klasse**.
 - If you're hands-on and want to work in a trade: **EUD or EUX**.
-

Would you like help exploring one of these options more deeply? Or do you want to take a short quiz to help clarify your interests?
