

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Republic of Korea. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing! You're in a great position to make thoughtful choices, and it's awesome that you're already reflecting on your future. Since you're fluent in Danish, have a multicultural background, and just finished primary school in Denmark (which typically ends at 9th grade or 10th with the optional year), let's walk through your main options in Denmark's education system and how they might suit you.

🎓 1. Gymnasium (STX, HHX, HTX, HF) – General Upper Secondary Education

This is the most common path if you're considering higher education later (like university). There are four main types:

- **STX (Studentereksamen)** – Broad academic focus: humanities, social sciences, natural sciences.
 - Good if you're not sure yet what you want to study.
- **HHX (Higher Commercial Examination)** – Focus on business, economics, marketing.
 - Good if you like commerce or plan to go into business, entrepreneurship, or marketing.
- **HTX (Higher Technical Examination)** – Focus on technology, IT, natural sciences.
 - Great if you're into tech, programming, engineering, or science.
- **HF (Higher Preparatory Examination)** – Shorter (2 years), more flexible.
 - Good if you want a faster route to further education, especially professional programs.

Recommendation:

If you're academically curious and might want to go to university later, **STX** is a solid, broad choice. If you're already passionate about business or tech, **HHX** or **HTX** could be better suited.

🔧 2. EUD / EUX – Vocational Education and Training

If you're more hands-on and want to go into a trade or get work experience quickly:

- **EUD (Erhvervsuddannelse)** – Trains you for a specific job like electrician, chef, mechanic, healthcare assistant, etc.
- **EUX** – A combo of vocational and academic. You get both a trade qualification and eligibility for higher education.

Recommendation:

If you're someone who learns better by doing and wants job security fast, **EUX** is a powerful path – especially if you want to keep your options open for further study.

3. Consider Your International Advantage

Being from a Korean background and fluent in Danish, you have cultural insight and maybe even language skills that could be really valuable. If you're also interested in:

- **Languages, international studies, or diplomacy** → STX with language focus
- **International business or global economics** → HHX
- **East Asian studies or translation work** → Later university study, starting with STX or HHX

You could also consider **exchange programs**, summer schools, or even studying part of your education abroad (e.g., in South Korea) later.

How to Choose?

Ask yourself:

- Do I enjoy academic subjects or hands-on tasks more?
- Am I interested in business, technology, healthcare, arts, or something else?
- Do I want to go to university later, or work after a few years?

Try These Next Steps:

1. **Visit educational fairs/open houses** (uddannelsesmesse / åbent hus events).
2. **Talk to a guidance counselor** (Studievejleder) at your school or municipality.
3. **Use online tools** like [UddannelsesGuiden \(ug.dk\)](https://www.uddannelsesguiden.net/) – it has quizzes and info tailored to your interests.

If you tell me more about what subjects or careers interest you, I can give you more tailored advice. Would you like help exploring that next?
