

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Republic of Korea. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great point in life to start exploring your options seriously, and it's good that you're already thinking about your future path. Since you've just finished primary school in Denmark (which typically ends after 9th grade), your next step is usually choosing a **youth education program (ungdomsuddannelse)**.

Here are your main options in Denmark:

1. Gymnasiale uddannelser (General upper secondary education)

These are for you if you enjoy academic learning and might want to go to university later.

Common types:

- **STX (Almen studentereksamen)** – Broadest option, strong in languages, history, science.
- **HHX (Højere handelseksamen)** – Focus on business, economics, marketing.
- **HTX (Højere teknisk eksamen)** – Focus on technology, science, engineering.
- **HF (Højere forberedelseseksamen)** – Shorter (2 years), more practical, good if you want a faster route to further studies.

✓ *Best if:* You want to keep your options open or plan to attend university.

2. Erhvervsuddannelser (Vocational education and training - EUD)

These are practical programs where you combine school and internships (arbejdsliv).

Examples:

- Electrician
- Carpenter
- Hairdresser
- Chef
- IT support

- Health care assistant

✓ *Best if:* You want to work sooner or have a clear interest in a skilled trade.

3. IB (International Baccalaureate)

This is an international program taught in English. It can be found in larger cities like Copenhagen or Aarhus.

✓ *Best if:* You're internationally minded or might want to study or work abroad (e.g., in Korea, UK, or USA).

4. Other Options

Since your parents are from South Korea, you **could consider studying in Korea** in the future – either through a university program or an exchange. If you're interested in Korean culture, language, or tech industries, this can be a big plus.

What should guide your choice?

-  Are you interested in science, tech, business, languages, or something else?
 -  Do you prefer working with people or machines?
 -  Do you like academic work, or do you learn better hands-on?
 -  Do you want to go to university or start working earlier?
-

A few example paths:

- **Want to go to university in Denmark later?** → Choose **STX, HHX, or HTX** depending on your interests.
 - **Interested in business and economics?** → HHX is great.
 - **Like building or hands-on work?** → Vocational education (EUD) might suit you.
 - **Want something international, maybe study abroad?** → Consider **IB** or STX with a language focus.
-

If you tell me more about your interests, favorite school subjects, or career ideas, I can give you more personalized suggestions.
