

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Republic of Moldova. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — and congratulations on finishing primary school! At 16 in Denmark, you're at a crucial point where your choices can shape your future, but don't worry — nothing is set in stone. Here's a clear overview of your main options, along with tailored advice to help you decide:

Main Educational Paths After Primary School (Folkeskolen)

1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are typically 3-year programs preparing you for higher education (e.g., university).

- **STX (Almen studentereksamen)** – Academic and broad; good for university paths.
- **HHX (Handelsgymnasiet)** – Focus on business, economics, and marketing.
- **HTX (Teknisk gymnasium)** – Focus on science, technology, and IT.
- **HF (Højere forberedelseseksamen)** – 2-year program; often for students who are more mature or want a quicker path to specific professions.

✅ **Recommended if** you enjoy academic subjects and might want to go to university.

2. Erhvervsuddannelser (Vocational Education and Training - VET/EUD)

Hands-on programs (2-5 years) that combine school and apprenticeship. You learn a trade and can start working right after.

Examples:

- Electrician
- Mechanic
- Carpenter
- Social and health care assistant
- Chef

✅ **Recommended if** you like practical work and want to start earning earlier.

3. EUX (Combined Academic and Vocational Education)

Gives you both a vocational education **and** a studentereksamen (like STX) — so you can work *or* go to university.

✓ **Great if** you're ambitious, hands-on, and want to keep future options open.

How to Choose?

Ask yourself:

- **Do I prefer academic or practical learning?**
 - **What subjects do I enjoy most?**
 - **Am I interested in university later?**
 - **Do I want to work sooner and learn through doing?**
-

Bonus: Use Your Background

Being bilingual and having Moldovan roots is a **big asset**:

- Consider international business, translation, diplomacy, or multicultural work.
 - Your language skills (Romanian, Danish, English) can be valuable in jobs like **interpreter, EU work, NGOs, import/export, or tourism.**
-

My Personal Recommendation

If you're not 100% sure what you want yet:

➡ **Start with STX or HF**, unless you *know* you want a trade (then go for EUD or EUX).

- STX keeps the door open for most careers — from doctor to lawyer to teacher to engineer.
- HF is shorter and more focused but limits some university options.

If you like hands-on learning but still want a high-level education:

➡ **Go for EUX** — it's demanding but gives you the best of both worlds.

If you'd like, I can help you narrow it down further if you tell me:

- What subjects you like/dislike
- Whether you want to go to university or start working earlier
- What kind of lifestyle or job you imagine in the future

Let me know, and I'll help you map it out.
