

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Russian Federation. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that—you're at an exciting point in your life! In Denmark, after finishing **primary school (folkeskole)**, you have several educational paths depending on your interests, strengths, and long-term goals. Here's a breakdown of your main options and how to choose the best one for **you**:

🎓 1. Gymnasiale Uddannelser (Upper Secondary Education – Academic Path)

These are great if you:

- Enjoy school and academic subjects
- Might want to go to university later
- Like general education more than hands-on work

Main types:

- **STX (Almen studentereksamen)**: Broad, with humanities, sciences, and social sciences
- **HHX (Højere handelseksamen)**: Focus on business, economics, and marketing
- **HTX (Højere teknisk eksamen)**: Focus on science, technology, and engineering
- **HF (Højere forberedelseseksamen)**: 2-year version, good if you want a shorter path to higher education

Recommended if:

You're academic, enjoy learning in a traditional way, and are considering university (or just want to keep doors open).

🔧 2. Erhvervsuddannelser (Vocational Education – Practical Path)

These are great if you:

- Want to start working sooner
- Prefer hands-on work over academic subjects
- Like clear career paths like becoming a carpenter, hairdresser, chef, mechanic, etc.

Often combines:

- Time in school learning theory
- Apprenticeship with a company

Recommended if:

You want to learn a trade or practical job and aren't planning to go to university right now.

 3. EUX – A Mix of Vocational + Academic

This is a **combination** of vocational training + general upper secondary education.

You get a **studentereksamen and** a vocational qualification.

Recommended if:

You want job skills *and* want to keep the option of university open. It's a bit tougher, but very practical.

 How to Decide? Ask Yourself:

- Do I like school and studying? → **Go gymnasial (STX, HHX, etc.)**
 - Do I prefer practical, hands-on work? → **Go vocational (EUD)**
 - Want both? → **EUX**
 - Not sure yet? → **Talk to a guidance counselor (Studievalg) or a UU-vejleder**
-

 Final Thoughts & Personal Advice

Since you're fluent in Danish, born here, and just finished primary school, you have the same opportunities as any Danish student. If you're unsure, **STX or EUX** are great options—they keep many doors open.

If you have a passion (e.g. computers, cars, cooking, business), let's explore it and I can help you choose more precisely.

Would you like help figuring out what you're good at or interested in? I can also ask you a few questions to help narrow things down.
