

# Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Saint Lucia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — and congrats on finishing primary school! At 16 in Denmark, you're at a key decision point where your next steps can shape your future, but you still have flexibility to explore.

Here's a breakdown of your main options and some advice tailored to your situation:

## Educational Paths After Primary School in Denmark

### 1. Gymnasiale Uddannelser (Upper Secondary General Education)

- **STX (Studentereksamen)** – Strong academic focus (humanities, sciences, social sciences).
- **HHX (Higher Commercial Examination)** – Business, economics, international trade.
- **HTX (Higher Technical Examination)** – Technology, science, engineering.
- **HF (Higher Preparatory Examination)** – 2-year version, often more flexible.

**Good if:** You're interested in university, or not yet sure what career you want. STX is the most common, but HHX or HTX may fit better if you like business or technology.

### 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

- Combines school and apprenticeship.
- You learn a trade (e.g. electrician, carpenter, hairdresser, chef).
- Often leads to good job opportunities quickly.

**Good if:** You want to start working sooner, or enjoy hands-on learning rather than academic schoolwork.

### 3. Kombinerede Forløb (EUX)

- Combines vocational training with general upper secondary education.
- You get both a trade qualification **and** access to higher education.

**Good if:** You want the best of both worlds — practical skills **and** the option to go to university.

## Self-Reflection: What Should You Consider?

Ask yourself:

- Do I enjoy academic learning or more practical, hands-on activities?
- Do I want to go to university later?

- What subjects or areas interest me most (business, technology, science, people, design, etc)?
  - Do I want to start earning money sooner, or invest more years in school?
- 

## **Cultural Bonus: You're Danish + Saint Lucian**

Your multicultural background gives you a unique perspective. You could:

- Study international business (HHX is a good path).
  - Explore language and culture studies (STX or HF).
  - Use your identity to stand out in fields like communication, global development, or tourism.
- 

## **Recommendations Based on Your Info**

If you're **unsure** what you want yet:

- **STX** or **HF** give you broad options later.

If you're **interested in business or entrepreneurship**:

- **HHX** is a great fit — and may connect you to international markets (including Caribbean connections).

If you're more **tech- or science-oriented**:

- **HTX** could open doors to engineering, IT, biotech, etc.

If you're **eager to work sooner** and like working with your hands:

- **EUD** or **EUX** in a trade that interests you (and **EUX** keeps university open as an option).
-
