

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Saint Lucia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's great you're thinking ahead—this is an important step, and you've got options. Since you're 16, born and raised in Denmark, and just finished primary school (folkeskole), the next step usually depends on your interests, strengths, and whether you prefer hands-on learning or academic studies.

Here's a breakdown of your **main options in Denmark after 9th or 10th grade**:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are ideal if you think you might want to go to university later.

STX – Studentereksamen

- **Focus:** Broad academic subjects (science, languages, social studies, etc.)
- **Good if:** You like school subjects, writing, and thinking critically.
- **Leads to:** University or professional education.

HHX – Higher Commercial Examination

- **Focus:** Business, economics, marketing, languages.
- **Good if:** You're interested in international business or finance.
- **Leads to:** Business degrees or jobs in trade/marketing.

HTX – Higher Technical Examination

- **Focus:** Technology, science, innovation.
- **Good if:** You enjoy tech, engineering, programming, or science.
- **Leads to:** Technical university programs or applied sciences.

HF – Higher Preparatory Examination

- **Focus:** Shorter, more flexible (2 years), less theoretical.
- **Good if:** You want a simpler way to university or aren't sure yet.
- **Leads to:** Shorter university programs or professional schools.

2. Erhvervsuddannelser (Vocational Education – EUD/EUX)

These are great if you want to learn a trade and start working sooner, or combine hands-on work with academics.

EUD – Vocational Training

- **Focus:** Direct path to work as a skilled tradesperson.
- **Jobs like:** Carpenter, electrician, chef, hairdresser, etc.
- **Duration:** 3–4 years (with apprenticeship).
- **Good if:** You like working with your hands and learning by doing.

EUX – Vocational + Academic

- **Mix:** Combines vocational training with gymnasial-level academics.
- **Good if:** You want both a trade and the option to go to university.
- **Challenging but flexible.**

How to Decide?

Ask yourself:

- Do I enjoy theory or practical learning more?
- Am I interested in university, or would I prefer to get a job and earn money earlier?
- What subjects or types of work excite me the most?

Extra thoughts, since you have Caribbean heritage:

- Consider **language or international programs** (especially HHX or STX) if you're interested in bridging Danish and Caribbean culture in business or politics.
- If you speak or want to learn **English/Spanish/French**, that could give you strong international opportunities.

My suggestion:

If you're not sure but want to keep doors open:

- **STX or EUX** are very strong choices.
If you already know you want to work with your hands or have a specific interest:
- **EUD** in your favorite field could be a great way to start earning and building skills fast.

If you tell me a bit more about your interests or dream job, I can recommend more specifically!
