

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from San Marino. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing that! Since you're 16, finished primary school in Denmark, and are fluent in Danish, you're at a key transition point in the Danish education system. Based on your background, here's a structured overview of your main options — plus some tailored suggestions to help you decide.

🎓 Main Educational Paths After Primary School (Folkeskole) in Denmark

After 9th or 10th grade, you typically choose one of these:

1. Gymnasiale uddannelser (Upper Secondary General Education)

These are for students who plan to go to university later.

- **STX (Almen studentereksamen)** – General upper secondary school with a broad range of subjects.
- **HHX (Højere handelseksamen)** – Focus on business, economics, marketing.
- **HTX (Højere teknisk eksamen)** – Focus on technology, science, and innovation.
- **HF (Højere forberedelseseksamen)** – Shorter 2-year program, more flexible, good if you prefer practical approaches.

👉 **Best if:** You enjoy academic subjects and are considering higher education (e.g., university or professions requiring a degree).

2. Erhvervsuddannelser (EUD) – Vocational Education & Training

Practical education leading to a trade or job.

- You start with **Grundforløb** (basic course), then go into an **apprenticeship** with a company.
- Can become: Electrician, chef, carpenter, mechanic, healthcare assistant, etc.
- Can also lead to further education later (like **EUX**).

👉 **Best if:** You like hands-on work, want to start earning sooner, or are interested in a skilled trade.

3. EUX – Vocational + General Education Combined

A mix between EUD and Gymnasium: you get a vocational qualification **and** a study-qualifying exam.

👉 **Best if:** You want to keep your options open — start a career **or** study at university later.

4. 10th Grade (10. klasse)

Optional extra year of school to mature or decide what you want next. Some do it at a **efterskole** (boarding school for teens) to explore interests and make new friends.

👉 **Best if:** You're unsure and want to improve academically or socially before choosing a path.

💡 Recommendations Based on Your Situation

Since you're:

- Fluent in Danish
- Culturally Danish but with San Marino roots (could be an asset!)
- Just finished primary school (likely 9th grade)
- Open to your next step

Here are some **suggested questions and recommendations:**

🔍 Ask Yourself:

1. Do I like school-style learning (books, projects, lectures)?
 2. Or do I prefer hands-on learning and real-world work?
 3. Do I think I'll want to study at university later?
 4. Am I interested in business, science, creative fields, or practical work?
-

🕒 Suggestions:

- **If you're academic and unsure of your future career**, go for **STX** — it keeps all options open.
 - **If you're into business/economics**, **HHX** could be ideal.
 - **If you like tech/science**, **HTX** is a strong choice.
 - **If you want a quicker route to a job**, consider **EUD** — especially in fields like tech, culinary, healthcare, or construction.
 - **If you want both job-readiness and the chance to go to university later**, **EUX** is excellent.
 - **If you're unsure or want to try something different socially**, 10th grade or **efterskole** could give you the space to grow.
-

🌍 Bonus Tip:

Since your parents are from **San Marino**, you might also consider learning **Italian** (if you don't already speak it) and exploring international opportunities — being bilingual or trilingual is a big advantage

later in education and work.

If you'd like, I can help you:

- Compare STX vs HHX vs HTX more deeply
- Explore specific vocational programs near you
- Plan a path from where you are now to your dream job or lifestyle
