

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Sao Tome and Principe. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself—that helps a lot. Since you're 16, just finished primary school (likely **9th or 10th grade** in Denmark), and are fluent in Danish, you're now at an important decision point in the Danish education system. Here's a breakdown of your **main educational options** and how you might choose the right one:

1. Gymnasiale uddannelser (Upper Secondary Education)

These programs are meant to prepare you for university. Great if you enjoy academic subjects and might want to study further.

Options:

- **STX** (*Almen studentereksamen*): Broad focus on humanities, social sciences, and natural sciences.
- **HHX** (*Højere handelseksamen*): Focus on business, economics, and marketing.
- **HTX** (*Højere teknisk eksamen*): Focus on technology, science, and engineering.
- **HF** (*Højere forberedelseksamen*): A 2-year general program, usually for students who want a shorter academic route.

Recommended if:

- You're curious, like school, and want to keep university options open.
- You're not sure what you want to be yet — it leaves many doors open.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These are hands-on programs that combine school with apprenticeship (praktik). After 2–4 years, you can start working in a trade or craft, or continue into **EUX** or **adult education**.

Fields include:

- Electrician, mechanic, carpenter
- Healthcare assistant
- Chef, baker
- IT technician, media graphics

Recommended if:

- You like practical work and learning by doing.
- You want to start working sooner.
- You might want to run your own business one day.

EUX is a special version that combines vocational training with general upper secondary subjects — great if you want **both job readiness and the option to go to university** later.

3. Other considerations

- Do you want to **study abroad someday**, perhaps in Portugal or elsewhere in Europe?
- Are you interested in **entrepreneurship**, tech, or creative fields?
- Do you want to work **with people**, in **business**, or in **science**?

My Personal Recommendation (based on your profile)

Since you're fluent in Danish, born in Denmark, and have completed primary school, you can succeed in **any path**. Here are **3 suggestions** based on different directions you might want to explore:

Goal	Recommended Path	Why?
You're curious, want options, or university later	STX or HF	Broad education, keeps many doors open
You like business or want to run something someday	HHX or EUX Business	Learn marketing, finance, entrepreneurship
You like doing things hands-on (e.g. tech, construction, care work)	EUD or EUX	Gain a career and income faster; EUX keeps academic options too

Final Tips

- **Talk to your school counselor** – they can guide you and help you apply.
- **Visit open house events** (*introdage*) at schools you're interested in.
- Don't stress about making the "perfect" choice — in Denmark, **it's okay to change direction** later.

If you'd like, I can also suggest specific career paths or help you explore jobs that might interest you — just let me know what you like or are curious about!
