

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Saudi Arabia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself—that really helps! Since you're 16 and just finished primary school in Denmark, you're likely considering what kind of **youth education (ungdomsuddannelse)** to take next. Denmark offers several great options, and the right choice depends on your **interests, strengths, and future goals** (even if you're not 100% sure yet—that's okay!).

Here's a breakdown of your main options and what they're good for:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education / High School)

These are good if you think you might want to go to university later.

A. STX (Almen Studentereksamen)

- Broad general education – includes Danish, English, sciences, humanities, and more.
- Good if you're not sure what to study later.
- Lasts 3 years.

B. HTX (Teknisk Studentereksamen)

- Focuses more on science, technology, and innovation.
- Good if you like STEM (science, tech, engineering, math).
- 3 years.

C. HHX (Handelsgymnasiet)

- Focus on business, economics, and languages.
- Good if you're interested in business, finance, or international trade.
- 3 years.

D. HF (Højere Forberedelseseksamen)

- Shorter: only 2 years.
- More practice-oriented.
- For slightly older students or those who want a faster route to higher education.

✅ Recommended if: You enjoy academic subjects and may want to go to university.

2. Erhvervsuddannelser (Vocational Education / EUD)

- Combines school + apprenticeship (praktik) at a company.
 - You train for a specific job (e.g. electrician, hairdresser, carpenter, IT supporter).
 - Takes 3-5 years depending on the field.
 - You earn money during your internship.
- ✓ Recommended if: You want to work more practically and get into a job sooner, or if university isn't your thing.

3. EUX – The Best of Both Worlds

- A combination of **vocational training + high school level courses**.
 - You become skilled in a trade AND get the qualifications for university.
 - Harder workload but more flexible options.
- ✓ Recommended if: You like hands-on work *and* want to keep the door open for further studies.

My Suggestions for You

Since you're fluent in Danish, born and raised in Denmark, and just finished primary school:

- If you **like school** and think you might want to go to **university**, STX or HHX is a strong choice.
- If you're **interested in tech or engineering**, go for HTX.
- If you're **more hands-on** or want to **start working earlier**, check out EUD or EUD.
- If you're **not sure**, STX gives the broadest foundation and leaves the most doors open.

Extra Tips

- Talk to a **UU-vejleder (youth education counselor)** at your school or kommune. They can guide you based on your interests and grades.
- Visit **open house events** (åbent hus) at local schools.
- Look at **studentereksamener** and **erhvervsuddannelser** on: ug.dk – a great resource in Danish.

Would you like help figuring out the best path based on your interests (e.g. science, art, tech, business, etc.)? I can help you decide more specifically if you tell me a bit more about what you enjoy or what you're good at.
