

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Senegal. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you've just finished **primary school in Denmark** (typically ends at grade 9, age 15–16), you're now at an important point in your educational journey. In Denmark, your next steps usually fall into one of **three main paths**, depending on your interests, strengths, and long-term goals.

✓ Your Options After Primary School in Denmark

1. Gymnasiale uddannelser (Upper Secondary School – for higher education)

If you're academically inclined and possibly want to attend university one day, these are great options. They generally last **3 years**.

- **STX (Studentereksamen)** – General upper secondary education. Broad subjects including sciences, humanities, and social sciences.
- **HHX (Højere Handelseksamen)** – Focus on business, economics, marketing. Great if you're interested in international trade or entrepreneurship.
- **HTX (Højere Teknisk Eksamen)** – Focus on technology, natural sciences, and IT. Ideal if you're into engineering, science, or innovation.
- **HF (Højere Forberedelseksamen)** – Shorter (2 years), more flexible. For those who want to prepare for specific further education.

👉 *Best if:* You enjoy school, want to keep many doors open, and may want to go to university or another long education later.

2. Erhvervsuddannelser (VET – Vocational Education and Training)

This combines **school + apprenticeship**. You learn a trade or profession and often get paid during apprenticeships.

- Examples: Electrician, hairdresser, mechanic, chef, IT-supporter, healthcare worker.
- Takes 2–5 years depending on the program.
- Leads to good job opportunities or further education.

🔧 *Best if:* You want a practical education, earn money while studying, and get a clear path to a job.

3. Kombinerede forløb (EGU, EUX)

These are mixes of academic and vocational paths.

- **EUX:** Combines vocational training with gymnasium-level courses, so you can both **work a trade and qualify for university**.
- **EGU (Erhvervsgrunduddannelse):** For students who need a more practice-focused path and aren't sure yet what trade they want.

⚙️ *Best if:* You want hands-on experience **and** keep the option for higher education open.

How to Decide

Here are a few questions to help figure out your direction:

- Do you like school subjects like math, languages, or science? → **STX, HHX, HTX, or HF**
- Are you more hands-on and want to work sooner? → **VET / EUX**
- Do you want a mix? → **EUX**
- Are you unsure or need extra support figuring it out? → Talk to a **UU-vejleder (youth guidance counselor)** – they're there to help!

Other Considerations

- **Language:** Since you're fluent in Danish, you're well-prepared. You could also consider improving your **English or French** (common in Senegal) to widen your future opportunities.
- **Background:** With your multicultural background, you might be especially well-suited for fields like **international business, global development, or cultural studies**.
- **Passions:** What do you enjoy doing? Music, sports, coding, helping others, cooking? These interests can help guide you to a fitting education.

Recommendation Based on You:

Since you're young, fluent in Danish, and just finished primary school:

- If you're **academic and open to university:** Start with **STX or HHX**.
- If you're **practical and want to learn a trade:** Try **EUX** for flexibility, or a vocational path with something hands-on you enjoy.

Would you like help narrowing it down based on your interests (e.g., tech, business, creative work, etc.)? I can help guide you more specifically if you share what you enjoy or are curious about!
