

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Senegal. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! Since you're 16, just finished primary school in Denmark (which likely includes 9th or 10th grade), and you're fluent in Danish, you have a few strong options ahead of you. Your next step depends on your interests, strengths, and long-term goals — but I'll break it down clearly so you can make an informed choice.

Main Educational Paths in Denmark After Primary School

1. Gymnasiale Uddannelser (Upper Secondary Education – 3 years)

These are academic, general programs that prepare you for university.

- **STX (Almen studentereksamen):** Broadest, most general academic path.
- **HHX (Højere handelseksamen):** Focus on business, economics, and marketing.
- **HTX (Højere teknisk eksamen):** Focus on science, technology, and engineering.
- **HF (Højere forberedelseksamen – 2 years):** A bit more flexible and shorter; ideal if you want to study at university but want fewer years in school.

✓ Good if: You like school subjects, want to go to university, or aren't sure yet.

2. EUD (Erhvervsuddannelse – Vocational Education & Training – 2-5 years)

Learn a profession like electrician, hairdresser, mechanic, chef, carpenter, healthcare assistant, etc.

✓ Good if: You want a job quickly, like hands-on work, and prefer learning by doing.

🔥 *Bonus:* You can earn money during your apprenticeship, and it can still lead to higher education later (e.g., via *EUX* or *EUD+*).

3. EUX (Vocational + Academic – 4-5 years)

Combines vocational training **with academic studies**, so you can become a skilled worker **and** still have the option to go to university.

✓ Good if: You want a job and also want to keep doors open for further study.

What to Ask Yourself

Here are some questions that can help you choose:

- Do you enjoy reading, writing, and school subjects? → Maybe STX or HF.

- Do you prefer working with your hands, tools, or practical work? → EUD or EUX.
 - Do you dream of starting a business one day? → HHX could be perfect.
 - Are you into tech, IT, or science? → HTX or EUX with a technical line.
-

Your Background & Identity

Being from a Senegalese background and growing up in Denmark is a strength. You can bring a unique perspective, especially in fields like:

- **Healthcare** or **social work** – helping diverse communities
 - **Business** – especially international trade, where cultural understanding is a plus
 - **Technology** – Denmark needs more skilled IT people, and it pays well
 - **Education** – becoming a role model for others with multicultural backgrounds
-

Some Final Tips

- Visit www.ug.dk – Denmark's main site for education guidance.
 - Talk to a **UU-vejleder** (youth education advisor) at your school or kommune. They can help you set up visits or internships.
 - Try **brobygning** (bridge-building programs) to test a gymnasium or vocational school before you choose.
-

Want help choosing based on your interests?

If you tell me what subjects or activities you like (math, writing, helping people, sports, fixing things, etc.), I can give you a more personal recommendation.
