

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Serbia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — it's great that you're already thinking carefully about your next steps. In Denmark, after primary school (folkeskole), you have several educational paths to choose from depending on your interests, academic strengths, and career goals. Here's a breakdown of your main options and what might be best depending on your personality and ambitions:

1. Gymnasiale uddannelser (General Upper Secondary Education)

If you're interested in going to university later, this is the most direct route.

Main types:

- **STX (Alment gymnasium):** Broad focus – humanities, science, social science.
- **HHX (Handelsgymnasium):** Focus on business, economics, and languages.
- **HTX (Teknisk gymnasium):** Focus on science, tech, and innovation.
- **IB (International Baccalaureate):** English-language international program – great if you want to study abroad later.

✓ **Best for you if:** You like academic subjects and might want to go to university in Denmark or abroad.

2. Erhvervsuddannelse (Vocational Education and Training - EUD)

Combines school and apprenticeship. You learn a trade and often get paid during the apprenticeship period.

Examples of fields:

- Electrician, carpenter, hairdresser, chef, mechanic, social and healthcare worker, etc.

✓ **Best for you if:** You prefer hands-on learning, want to start working earlier, or have a specific trade or job in mind.

3. EUX – A mix of vocational training and gymnasium

This combines a vocational education with a general upper secondary education. You learn a trade **and** get a studentereksamen, meaning you can also apply to university.

✓ **Best for you if:** You want flexibility – maybe you're interested in a trade but also want the option to study more later.

How to decide?

Ask yourself these questions:

- Do I enjoy academic subjects (math, literature, science)?
- Do I prefer learning through doing or studying?
- Do I want to go to university?
- What kind of work or lifestyle appeals to me?

If you're not sure yet, **STX or HHX** are good starting points because they keep your options open.

Bonus: Your bilingual and bicultural background

Being fluent in Danish and having Serbian roots can be a big asset. You could consider paths where language, culture, or international skills are useful – like translation, diplomacy, international business, education, or social work.

Final Tips

- Visit your local **UU-vejledning** (Youth Guidance Center). They can offer personalized help.
- Try to attend open houses or info sessions at local schools.
- Talk to older students about their experiences.

Would you like help exploring specific careers or interests (e.g., tech, medicine, creative fields)? I can suggest paths based on that too.
