

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Serbia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that — it's great that you're already thinking carefully about your next steps. Since you've just finished primary school (which in Denmark ends after **9th or 10th grade**, depending), the next stage is **youth education** ("ungdomsuddannelse"). Your choice depends on your interests, strengths, and long-term goals. Here's a breakdown of the main options in Denmark:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education)

These are general academic programs that prepare you for university.

STX (Studentereksamen)

- Broadest academic education
- Strong in humanities, social sciences, and sciences
- Good for university later

HHX (Higher Commercial Examination)

- Focus on business, economics, and international trade
- Good if you like business, marketing, or finance

HTX (Higher Technical Examination)

- Focus on technology, science, and IT
- Great for engineering, tech, or science paths

HF (Higher Preparatory Examination)

- Shorter, 2-year academic program
- More mature students, or those who want a quicker path to university

Recommendation:

If you're unsure what you want to study in the future, **STX** gives the broadest foundation. If you're into tech, **HTX** might suit you better.

🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD/EGU/EUX)

These are for you if you want to **learn a trade** and start working earlier, with practical training.

- Examples: electrician, carpenter, mechanic, hairdresser, chef
- Often include apprenticeships
- You can **earn money** while you learn
- **EUX** combines vocational training with academic subjects – so you can **work or go to university later**

Recommendation:

If you like practical, hands-on work and want to start earning earlier, **EUD** or **EUX** could be excellent choices. **EUX** is great if you also want the option to study later.

Still Unsure?

If you're not ready to decide, you could look into:

- **10th grade** ("10. klasse") – an extra year to explore subjects and prepare
- **Intro courses or education fairs** – visit **ungdomsuddannelser** and talk to advisors
- Talk to a **UU-vejleder** (youth education counselor) – they'll help you understand your options

Bonus: Being from a Bilingual Background

Your Serbian roots and Danish fluency are a strength! If you're also interested in languages, culture, or international careers, that could guide your choice too — for example:

- HHX with an international line
- STX with foreign languages
- Exchange programs later

My Recommendation Based on What You Shared:

If you like learning, are fluent in Danish, and are open to university later, **STX or HTX** might be the most flexible and future-proof. But if you're eager to work sooner or prefer hands-on learning, **EUX** is a fantastic and often underrated choice.

Would you like help exploring a specific interest, like tech, healthcare, art, or business? That could help narrow things down even more.
