

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Serbia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background—you're in a great position to make some exciting choices. In Denmark, after finishing primary school (folkeskole), you typically choose one of several paths depending on your interests, strengths, and future goals.

Here's a breakdown of your main options:

1. Gymnasiale uddannelser (Upper Secondary Education – Academic Track)

If you're interested in continuing your studies at a university later, this is a strong route.

- **STX (Studentereksamen):** Broadest academic program. Great if you're not sure what you want to specialize in yet.
 - **HHX (Higher Commercial Examination):** Focuses on business, economics, and languages. Good for careers in trade, business, or economics.
 - **HTX (Higher Technical Examination):** Focuses on science, tech, and engineering. Ideal if you enjoy math, physics, or programming.
 - **HF (Higher Preparatory Examination):** Shorter (2 years), more practical, and good if you want a flexible path to university or professional education.
- ♦ **Choose this if:** You enjoy academic subjects, want to keep university options open, and are motivated to study.

2. Erhvervsuddannelse (Vocational Education and Training – EUD)

This is a hands-on path combining school with apprenticeship.

- **Fields:** Everything from mechanics, IT, construction, healthcare, culinary arts, to childcare.
 - You can start right after 9th grade or take the **EUX**, which combines vocational training with academic subjects (giving you access to higher education too).
- ♦ **Choose this if:** You prefer practical, job-focused learning and want to start working sooner or have the option of further education later.

3. 10. klasse (Optional 10th Grade)

A chance to mature, improve grades, or figure out your direction.

- Some choose 10th grade in a **normal school, efterskole, or produktion skole**.
- Useful if you're unsure about your path or want to try something new in a different setting.
- ♦ **Choose this if:** You feel like you're not ready to jump into gymnasium or a vocational path yet.

Recommendations for You

Since you're fluent in Danish and born in Denmark, you have all the same opportunities as others your age. But your Serbian background might give you an edge in language, cultural understanding, or international perspectives—especially in fields like business, diplomacy, or tech.

Here's a **personalized suggestion**:

- **If you like studying and want a flexible future:** Go with **STX** or **HHX**.
- **If you're into tech, science, or engineering:** Consider **HTX**.
- **If you want to work with your hands or get a job sooner:** Look into an **EUD or EUX** program in a field that interests you.
- **Not sure yet?** A **10th grade efterskole** with a specific focus (e.g., media, sport, language, travel) can give you a clearer idea.
