

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Seychelles. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great point in your life to start thinking carefully about your future, and it's awesome that you're already doing so. Since you're in Denmark and just finished primary school (which usually ends around 9th or 10th grade), you're likely now considering options for upper secondary education.

Here are some personalized recommendations based on your situation:

🎓 Your Main Options in Denmark After Primary School:

1. Gymnasium (STX) – General Upper Secondary Education

- **Best for:** If you enjoy academic subjects (e.g., Danish, English, science, history).
- **Duration:** 3 years
- **Leads to:** University or other higher education.
- **Pros:** Broad education, keeps your options open, respected path.
- **Good for you if:** You're not sure what you want to do yet and want many doors open.

2. HTX (Higher Technical Examination Programme)

- **Best for:** If you're interested in science, tech, or engineering.
- **Duration:** 3 years
- **Leads to:** Technical or science university studies.
- **Pros:** More technical and practical than STX, still academic.
- **Good for you if:** You like technology or want to work in tech fields.

3. HHX (Higher Commercial Examination Programme)

- **Best for:** If you're interested in business, finance, or marketing.
- **Duration:** 3 years
- **Leads to:** Business-related university programs or careers.
- **Good for you if:** You're interested in economy, trade, international business (especially with your background, this might be a strong fit).

4. EUX (Vocational + Academic Education)

- **Best for:** If you want both practical skills and the chance to go to university.
- **Duration:** 4–5 years
- **Leads to:** Jobs or university studies.

- **Good for you if:** You want the best of both worlds – hands-on skills and an academic diploma.

5. EUD (Vocational Training)

- **Best for:** If you want to start working soon in a trade (e.g., electrician, carpenter, chef).
- **Duration:** 2–4 years
- **Leads to:** A skilled job or sometimes further education.
- **Good for you if:** You prefer practical learning and want to work right after school.

What to Think About When Choosing:

- Do you like studying academic subjects, or prefer doing hands-on work?
- Do you want to go to university later, or start working sooner?
- What are you passionate about – science, art, business, tech, helping others?

Bonus: Cultural Background

Being of Seychellois descent gives you a unique international profile. This could be especially useful in:

- International business (HHX)
- Tourism and hospitality (EUX or EUD)
- Languages and intercultural studies (STX or HHX)

My Suggestion Based on What You've Shared:

If you're academically strong and want to keep your options open:

 **STX or HHX** would be great.

- STX if you enjoy a wide range of academic subjects.
- HHX if you're curious about economics, marketing, or international business.

If you're more hands-on or career-focused:

 **EUX** could be a strong option – both a trade and a path to higher education.

If you want, I can help you make a pros-and-cons list based on your personal interests and strengths. Would you like to share what subjects or activities you enjoy most?
