

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Seychelles. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself — that's a great place to start. Since you're 16 and just finished **primary school** (or possibly "folkeskole" in Denmark, which usually ends around 9th or 10th grade), the typical next step is **youth education (ungdomsuddannelse)**. Your options depend on your interests, learning style, and career goals.

Here's a breakdown of your main options in Denmark:

1. Gymnasiale uddannelser (Upper Secondary Education)

If you're interested in continuing academic studies and possibly going to university later.

STX – Almen studentereksamen

- Broadest academic program.
- Focus on humanities, sciences, and social sciences.
- Good if you enjoy subjects like history, literature, biology, etc.

HTX – Teknisk studentereksamen

- Focus on science, tech, and engineering.
- More hands-on and project-based.
- Good if you like tech, design, programming, or innovation.

HHX – Handel studentereksamen

- Focus on business, economics, and marketing.
- Ideal if you're thinking about starting a business or working in finance.

HF – Højere forberedelseseksamen

- 2-year program, more direct and mature students.
- Good for those who didn't finish 10th grade or want a shorter path to further education.

2. Erhvervsuddannelser (VET - Vocational Education and Training)

If you're more hands-on and want to **start working faster** in a specific trade or profession.

Examples:

- Electrician, carpenter, mechanic
- Hairdresser, chef, social care worker
- IT support, web developer

You combine **school + paid apprenticeship**. This path is very practical and can lead to solid careers, and you can always return to school later.

What to Consider When Choosing:

- **Do you enjoy academic study, or do you prefer learning by doing?**
- **Do you want to go to university one day, or start working sooner?**
- **Are there specific fields you're passionate about?** (Tech? Business? Helping people?)

Recommendation Based on What You Shared

Since you're fluent in Danish and grew up in Denmark, you have full access to the same options as any Danish student. With your background from Seychelles, you might also bring a unique perspective — that could be an asset in international business, diplomacy, or tourism.

If you're unsure about your long-term goals:

 **STX** is a flexible choice that keeps most doors open.

If you already know you're into **tech, engineering, or design**:

 **HTX** could be a great fit.

If you're drawn to **business, entrepreneurship, or economics**:

 **HHX** would suit you well.

If you're more practical and want to **start working and earning sooner**:

 Consider a **vocational education (EUD)**, especially in areas like IT, construction, or culinary arts.

If you want, I can help you explore specific schools or programs in your area of Denmark. Just tell me which region or city you're in!
