

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Seychelles. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's great that you're thinking about your future already — and congrats on finishing primary school! Since you're 16 and have just completed *folkeskolen* (Danish primary and lower secondary education), you're at the typical stage where students in Denmark choose their next educational path.

Here are your main options, depending on your interests, learning style, and goals:

1. Gymnasium (STX, HHX, HTX) – if you're academically inclined

If you like school subjects and think you might want to go to university someday, one of the *upper secondary education* paths is a strong choice.

- **STX (Almen studentereksamen):** General academic path with focus on humanities, natural sciences, and social sciences. Good for many future university programs.
- **HHX (Højere handelseksamen):** Focus on business, economics, and international trade. Great if you're interested in entrepreneurship or finance.
- **HTX (Højere teknisk eksamen):** Focus on science, technology, and IT. Good for future engineers, tech fields, or applied sciences.

 Why choose one of these?

- You're unsure exactly what you want to do, but want to keep your options open.
- You like studying and see yourself going to university.

2. EUD (Erhvervsuddannelse) – Vocational education and training

This is a hands-on path that combines school with apprenticeships, leading directly to a job (or the option to later go to further education).

You can train in:

- Trades (electrician, carpenter, mechanic)
- Service (chef, hairdresser, healthcare assistant)
- Business (retail, logistics)

 Why choose EUD?

- You like practical, hands-on work.

- You want to start earning and working sooner.
- You're not a big fan of traditional classroom learning.

💛 3. EUX – A combination of academic and vocational

EUX lets you get both a *studentereksamen* and a *faglært* qualification. It's more work, but gives you flexibility — you can either get a job or go to university.

💡 *Why choose EUX?*

- You want a job skill *and* the option to go to university later.
- You're motivated and willing to take on a more demanding program.

💬 Personal Background Note

Since you're fluent in Danish and were born in Denmark, you're well-positioned for any of these. But your Seychelles background could also give you a unique edge if you're interested in international careers, tourism, culture, or languages — which could point toward HHX or global-focused education.

What Should You Do Next?

1. Think about your interests:

- Do you enjoy science, business, arts, tech, working with your hands, helping people?

2. Visit open house events (Åbent Hus):

- Try visiting local gymnasiums or vocational schools.

3. Talk to a guidance counselor (UU-vejleder):

- They're there specifically to help people your age with these decisions.

4. Try “brobygning” or internships:

- Some programs allow you to try a field for a few weeks to see how it feels.

If you tell me more about what you like — subjects, hobbies, future goals — I can give you a more personalized recommendation.
